# Westfield by Quest Awnings: a perfect partnership

Westfield by Quest is a partnership between two outdoor leisure companies. Westfield is a high end German brand sold all over Europe who are backed by the largest and most professional outdoor manufacturer in China.

Quest are a UK company who have been supplying the outdoor leisure trade with their own, exclusive products for over 30 years. The two companies have combined to bring you the best in high end manufacturing and processing from Westfield, combined with the expertise, exclusive designs and unrivalled support of Quest in one perfect partnership : Westfield by Quest.

**Enhanced support:** Not only do you get all of these benefits, but due to our unique partnership you get enhanced European support. This means if you have an issue even if you are away on holiday in Europe, we will endeavour to sort you out in the country you are in. We do not wait for you to come back, we help resolve the issue there and then on holiday, allowing you to continue enjoying yourself.

## PERFORMANCE RANGE

Luxury and top of the range.

The Performance range of Westfield by Quest awnings are the top of the range luxury air awnings. These are made from the very best materials, combining the very best technology and air systems to create a unique range of awnings.

They include the high end Advanced Air System which is unique in its ability to switch between single and multi-inflation and allows on site maintenance if required, allowing you to carry on and enjoy your holiday no matter what.

They represent the very best in air awnings.

## TRAVEL SMART PRO RANGE

Lightweight, ease of use with added durability.

The Travel Smart Pro range of Westfield by Quest awnings are a mid range of awnings which combine lightweight with durability.

They use midweight fabrics which give a great balance between lightweight, ease of use and durability. They include the high end Advanced Air System 2 which allows you to extend your awning from multi-inflation to a full single inflation kit at anytime if you so wish.

They represent the perfect balance between lightweight, durability and value.

## TRAVEL SMART RANGE

Extreme lightweight and ease of use.

The Travel Smart range of Westfield by Quest awnings are a lightweight range of awnings designed around ease of use. They use lightweight fabrics which make them the lightest and easiest awnings available.

The extreme lightweight nature of these awnings make them so easy to slide into the awning rail, that they can be done by one person.

They use the simple and effective Air Erect System 2, which combines simplistic technology that simply does not go wrong with ease of use making them even easier to use.

# HydraDore: Advanced fabrics

Fabrics are one of the most important parts of your awning or tent. They give it the ability to withstand the weather, make it heavy or light, easy to clean and contribute towards making the awning or tent easier or harder to maintain and live with. Westfield and Quest have developed a family of advanced fabrics called HydraDore which give different features and functions to your awning and tent.

## HydraDore *XT PRO*

This is a new generation 300D material which is unlike any other. It is woven in a completely new way giving it a higher tensile strength than standard 300D ripstop materials.

The coating helps add extra durability, makes it easier to clean and has an extremely high level of waterproofing.

It is also thread dyed rather than dip dyed. This means each individual thread has been dyed before it is woven together, allowing more dye to penetrate each thread creating a better and longer lasting colour.

## HydraDore *SP*

It is a strong, yet light 200D material with a durable coating that adds strength and stability to the fabric.

The fabric is made stronger by the addition of the ripstop giving you a perfect balance between strength, durability and weight.

It lasts longer than lightweight materials, is still lightweight and easy to use whilst giving you the durability and strength of a heavyweight material.

## HydraDore *SL PRO*

An advanced middleweight 150D material with a high performance coating. It keeps the weight down making the awning or tent easier to use, pack away and erect, but the added durability means it will last longer.

The high performance coating adds durability and gives you a very high level of water proofing and protection against the weather.

## HydraDore *SL*

An advanced lightweight 75D with a high performance U.V. coating. The coating gives the material extra protection against the harmful sun's U.V. rays and extends the life of your awning and gives you a high level of water protection.

The material is extremely lightweight making it easy to handle, fold and packs away to a small size. It is fast drying as it does not soak up the rain and is easy to clean.

# Included technology: Air systems and anti-weather

The Westfield by Quest awning range combines two different air systems and an anti-weather system to create unique awnings that provide features not readily available anywhere else.

The Advanced Air System (AAS) is a next generation air tube system. It has been created to give you the benefits of both a multi-inflation system as well as the ease of use of a single inflation system.

The system uses 4 layers for strength and stability. It has the internal bladder which is the part that you inflate. You then have a dual layer protective cover that has PE and polyester covers bonded together, the PE layer of the cover is also reinforced at the stress points giving it extra strength and stability. You then have a sleeve which is sewn into the awning. This not only improves the protection around your air tube, as well as the stability of the awning as the tube is held in position better.

The advanced air system goes one step further than its rivals by giving you the option of multi-inflation or single inflation. No longer do you have to choose between single or multi-inflation, you can have both and use whichever is better for you.

This single inflation system can be inflated by any of its independent valves giving you the maximum of flexibility and in the event of a failure you can simply just remove the affected tube and the system reverts automatically to an independent tube system.

The Air Erect System (AES) is a latest generation, easy to use, simplified air erect system. It is simplified to make it easier to use and less to go wrong.

The system uses 4 layers for strength and stability. It has the internal bladder which is the part that you inflate. You then have a dual layer protective cover that has a PE and polyester covers bonded together, that adds protection and increases stability. The PE layer of the protective cover is also reinforced at the stress points giving it extra strength and stability. You then have a sleeve which is sewn into the awning which adds a final layer of protection and stability. This not only improves the protection you get from the PC cover, but also the stability of the awning as the tube is held in place and position better.

The Air Erect System has individual air tubes rather than a joined system which makes each tube extremely easy to pump up and in the event of a failure only one tube is affected.

It also uses an easy to use single way valve for inflation which is simplicity itself, simply push the pump in and pump.

## *Anti-Weather System*

The anti-weather system is not one item but a host of improvements and updates that gives the awning better weather protection.

There are additional weather panels sewn into the canvas at points where the weather could get in. This panel is P.U. coated on both sides and taped on both sides giving you better weather protection.

There is additional guttering on external windows with zips, which add extra protection against the rain.

All tie back points or pockets that are sewn in are made from 100% waterproof PVC rather than standard webbing material. Standard material can soak water up and eventually lead to leaks, the waterproof PVC simply does not.

# The Aries

Style, features and amazing views

The Aries comes in two sizes, 350 and 260. It has large scenic windows giving you amazing views and allowing loads of natural light in, giving you the feeling of outside even when inside the awning. It can also be extended using the optional (sold separately) annex.

It features the excellent **HydroDore XT pro** fabric which means that this awning is amazingly strong, yet lightweight and will last for years. It has the unique **Advanced Air System** which is the only system available

that gives you the option of single or multi-inflation. You can have the cost saving benefits of multi-inflation or choose the optional single inflation kit to upgrade it to full single inflation at any time.

The removable front and side panels make this easier to pick up and slide through your awning channel, helping to make this awning easier to erect.

The awning comes with storm straps as standard and even has storm strap pockets allowing you to put them away when taking the awning down so they don't get tangled up making the awning easier to use.

## Features

- Available in two sizes

# Dorado Pro

## Lightweight performance

The Dorado pro is the all new and improved Dorado. It has a larger space (400 cm wide) and improved headroom making it feel much larger inside.

It uses the new **HydroDore SL Pro** fabric which gives you a great lightweight, easy to use awning with added durability making it last longer.

It comes complete with a storm roof pole giving you added strength and stability, but due to the use of the **Advanced Air System**, you can opt for the storm air

beam which gives you the added strength and stability, without the need for a storm pole.

The Dorado pro gives you a great amount of space in a lightweight awning that is extremely easy to use. The added durability of the pro fabric means it will also outlast its lighter rivals.

This awning is perfect for those looking for a lightweight awning, with good space, but want that added durability of a 150D material and the added option of single inflation.

### Features

- Advanced Air System
- Single inflation
- Double awning beading (4 and 6 mm)
- Anti-Weather system added protection
- Can be erected by one person
- Two independent front panels
- Front panels can be rolled up or used as sun canopies (with optional universal canopy pole kit)
- Rear pads included
- Clear view windows
- Built in ventilation and internal blinds
- 2 Full ventilation side doors
- Includes storm roof pole kit

### Details

- Warranty: 12 months
- Fabric: HydroDore SL PRO
- Windows: Superclear Transparent Foil
- HH: 4000 mm

### Optional Extras

- High volume, easy glide, bravo pump
- Breathable flooring
- Universal steel rear poles (pair)
- Front storm leg pole
- Universal canopy pole kit
- Quest serial LED light
- Quest LED lighting strip
- Windshield Pro

### Dorado 400 PRO

Awning Rail Height: 235 - 250 cm.

Width: 390 cm.

Depth: 250 cm.

Packed size: 105 x 25 x 25 cm.

Awning only weight: 7.5 kg.

Total weight: 10.5 kg.

# Gemini Pro

Added performance and features

The Gemini Pro is the all new and improved Gemini. It is a modernised classic look awning packed full of features. It uses the new **HydroDore SL Pro** fabric which gives you a great balance between lightweight, easy to use awning with added durability making it last longer.

It is inner tent ready, so it can have one or two air porch universal inner tents put inside it allowing you to add one or two bedrooms for those extra guests if needed. There are 5 doors available on the awning, with an eyebrow canopy over the front centre door stopping the rain and water coming in when the door is opened.

It also features the unique **Advanced Air System**, which is the only system on the market that allows you to have this awning in multi inflation or single inflation modes, the choice is up to you.

This awning is perfect for those looking for a large family awning that is easy to use, lightweight with added durability from the **HydroDore SL Pro** fabric.

## Features

- Advanced Air System
- Single or Multi-inflation
- Double awning beading (4 and 6 mm)
- Anti-Weather system added protection
- Three independent front panels
- Five doors (2 side, 3 front)
- Two ventilation windows to front and full ventilation side doors
- Canopy over middle front door
- Rear pads included
- Clear view windows with internal zipped blinds
- Permanent built in ventilation
- Complete with 3 storm poles
- Double beading for easy multi-vehicle attachment

Total weight: 17.6 kg.

# The Lynx

When space is at a premium

A great lightweight awning with a small footprint. Extremely easy to use, easy enough to erect by one person on their own.

It has large scenic windows allowing loads of light inside and great views when inside the awning. It gives you the feeling of outside even when inside the awning.

The use of the excellent **Air Erect System** means that the tubes are independent of each other and can be inflated with as little as 12 pumps on the pump. It comes with a

storm pole to add stability in adverse weather conditions. The small size is perfect when space is at a premium and when you only want a small porch.

Featuring the lightweight **HydroDore SL** fabric which gives you great performance in a lightweight fabric which makes this awning even easier to erect, use and store away when not in use. The fabric dries quickly, making it even easier to manage and use.

The perfect lightweight awning when space is at a premium or when you simply want a small porch.

## Features

- Available in two sizes
- Air Erect System
- Independent inflation points
- Double awning beading (4 and 6 mm - Lynx 240 only)

Total weight: 10.5 kg.

# Dorado

## The lightest and easiest awning

Combining the easy to use nature of a lightweight awning along with an easy to use air system means you get one of the simplest and easiest to use awnings available.

The latest **Air Erect system** combines ease of use and simplistic reliability in one great system. The system is simple, making it extremely easy to use but also reliable as there is little to go wrong, a perfect combination.

The use of one single air beam means that this awning can be erected in as little as 12 pumps on the included double action pump. Combine this with the excellent lightweight **HydroDore SL** fabric means that this awning can easily be erected by one person. The fabric is also very quick to dry making the awning easier to manage and use.

Added stability can be gained by the optional storm poles giving you benefit in adverse weather conditions and making this lightweight awning great for use in many different weather conditions.

This really is an extremely easy awning to erect, use and live with, the perfect lightweight air awning.

### Features

- Air Erect System
- Single inflation
- Double awning beading (4 and 6 mm)
- Anti-Weather system added protection
- Lightweight, quick and easy to erect
- Can be erected by one person
- Two independent front panels
- Front panels can be rolled up or used as sun canopies
- Rear pads included
- Built in ventilation and internal blinds
- 4 Doors (2 front and 2 side)
- 2 Full ventilation side doors

### Details

- Warranty: 12 months
- Fabric: HydroDore SL
- Windows: Superclear Transparent Foil

Depth: 250 cm.  
Packed size: 103 x 28 x 26 cm.  
Awning only weight: 5.6 kg.  
Total weight: 9.7 kg.

**Travel Smart Dorado 350 :**  
Shown with optional universal canopy pole kit (sold separately)

# Aquila

## Luxury and style for your motorhome

The perfect luxury motorhome awning which can also be used on a caravan. It is available in two sizes and features the amazing **Advanced Air System** which gives you the option of switching from multi-inflation to single inflation with the optional single inflation kit. It comes complete with a storm roof pole to give added stability in adverse weather conditions.

The two large scenic windows give you the perfect outlook and allows an amazing amount of light inside, whilst the eyebrow canopies add style and cover to the permanent built in ventilation. This ventilation helps keeps

the air flowing, but keeps the weather out, helping against condensation at all times.

The oversized front canopy is large enough to have a table and chairs under allowing you to really get outside, yet retain the cover from the elements and can be rolled away if you don't want to use it.

The use of the excellent **HydroDore SP** fabric means you get the perfect balance between strength and weight making it easy to use and very durable.

### Features

- Available in two sizes
- Advanced Air System
- Single or independent inflation
- HydroDore SP Fabric
- Anti-Weather system added protection
- Oversized front canopy that can be rolled away
- Reflective storm straps with strap tidy pockets
- Large full view scenic windows with internal blinds
- Built in ventilation and full ventilation tunnel door
- Includes storm roof pole
- Additional groundsheet for the tunnel
- Double beading and 3-way Tunnel attachment
- Half or whole fold rear panel

### Details

# Aquarius Pro

Designed and built for a camper

The Aquarius Pro has been designed and built for use on a camper van. It does come in two sizes (low and mid) allowing it to be used on other vehicles as well. It features the excellent **HydraDore SL PRO** fabric which gives you the best balance between light weight, for ease of use and durability for strength and longevity.

The awning features the excellent **Advanced Air System**, which gives you the option of turning your multi-inflation awning into a single inflation awning whenever you wish. It comes with a storm roof pole for added stability in adverse weather.

The excellent fully tubbed groundsheet helps keep the weather out, but with the peg down doorways does not cause trip hazards like its rivals. The small front canopy not only adds style but helps keep the rain and water out when the front door is opened. The side eyebrow canopies again add style, but also allows permanent built in ventilation which helps keep condensation down and keeps the air flowing inside.

It is also inner tent ready and can take a two berth inner tent inside to give you additional sleeping space if required.

## Features

- Available in two sizes Low and Mid)
- Advanced Air System
- Single or Multi-inflation
- HydroDore SL PRO Fabric
- Anti-Weather system added protection
- Large panoramic side windows
- Front canopy over awning front
- Clear view windows with internal blinds
- Built In ventilation and full ventilation tunnel door
- Additional groundsheet for the tunnel
- Complete with storm pole
- Double beading on 3-way tunnel attachment
- Half or whole fold rear panel

## Details

- Warranty: 12 months
- Fabric: HydroDore SL PRO

# Hydra

## Lightweight and performance

The Hydra comes in two sizes (high and low) and is an excellent mid sized motorhome awning that is amazingly easy to use, it can also be used on a caravan.

It uses the excellent **Air Erect System**. The simple and easy to use system also helps ensure reliability as there is nothing to go wrong and makes it extremely easy to inflate making the awning easy to erect and can even be done by one person.

The use of the superb **HydroDore SL** fabric means that this is extremely lightweight, making it even easier to

carry, store, use and erect. It is also quick to dry and U.V. coated to help prevent damage from the sun and prolong the life of the awning.

The addition of the door in the tunnel allows you to enter and exit the awning without walking through the main awning, perfect when you have muddy boots and coats.

The fully tubbed groundsheet is great at keeping the weather out, but with the added peg down doorways you can also remove those annoying trip hazards when the doors are in use.

## Features

- Available in two sizes
- Air Erect System
- Independent inflation points
- HydroDore SL fabric
- Anti-Weather system added protection
- Built in ventilation and full ventilation tunnel door
- Roll up and sun canopy front panel with full window
- 3 Way side windows
- Clear view windows with internal blinds
- Double beading and 3-way tunnel attachment
- Half or whole fold rear panel
- Full 'tub' groundsheet with peg down doorways
- Additional groundsheet for the tunnel

## Details

- Warranty: 12 months
- Fabric: HydroDore SL
- Windows: Superclear Transparent Foil
- HH: 3000 mm

## Optional Extras

- Van connection height: 240 - 280 cm.

# Hercules Pro

Loads of space, great features

The Hercules Pro. This is a large family tent that comes in two sizes (Hercules 8 & Hercules 10) the sleep capacity can be increased by using the included 'easy sleep' 2 berth inner tent.

It has a huge dark 'Easy sleep' inner tent with 2 removable panels allowing you to change it from 1 - 4 sections giving you complete freedom in your sleeping arrangements.

The inner tent is breathable, but still boasts permanent built in ventilation and the tent has the extended **Quest Fresh Air Vent** system to allow maximum air flow, minimum condensation and helps keep the tent cooler on hot days.

It features an additional electrical inlet making it easier to get the perfect placement of your power along with great views from all around thanks to the clear view windows.

The front is completely covered as standard giving you a fully covered area to the front of the tent. There are large full ventilation doors to the front and side give you easy and plenty of access along with additional air flow if required.

The tent features the **Quest Tec 150 PRO** fabric giving it excellent water proofing (5000mm), great durability, great U.V. resistance but still keeps the weight down.

## Features

- Quest Quick Air System
- Independent inflation points
- Quest Tec 150 PRO fabric
- Quest fresh air vents
- Extra high roof
- Fully covered front porch
- Oversized, full ventilation front and side doors
- Crystal clear windows
- Fully tubbed groundsheet
- Three or four doors on main inner tent
- 'Easy sleep' dark inner tent
- Removable partition walls in the main inner tent to allow for between 1 and 4 sections.
- Additional 2 berth 'Easy sleep' inner tent

System to let your tent breath

# Taurus 5

One person, one minute

The Taurus is an excellent family air tent. It easily sleeps 5 in the included inner tent. It has built in ventilation and full ventilation doors to the front and side allowing the maximum of airflow on those hot days.

The inner tent is breathable making it more pleasant inside. It has permanent ventilation built in and features a zipped partition wall allowing you to have a single large inner tent or two separate inner tents, each with their own door.

The tent uses the excellent **Air Erect System**, which means that the tent is extremely easy to inflate, with

each tube only taking around 12 pumps to inflate. It also ensures the system is reliable and easy to maintain even allowing you onsite repairs if required.

The use of the **HydroDore SL** fabric means that this tent is not only lightweight, but it packs away smaller and is fast drying making it easier to use, manage and maintain.

These features make this an extremely easy tent to erect, take down, pack away and carry, all of which make it easier to enjoy and allow you more time to relax and enjoy your break.

## Features

- Air Erect System
- Independent inflation points
- HydroDore SL fabric
- Lightweight and small pack size
- Quick and easy to erect
- Side door canopy
- Extra large front canopy gives extra shelter
- Full ventilation front and side doors
- 3 Way side window (half window, half mesh, full external blind)
- Clear view windows
- Fully tubbed groundsheet
- Split inner tent with zip out centre panel
- Organiser pockets on front and inside of inner tent
- Internal blinds
- Electrical inlet

- Quest LED lighting strip
- Windshield Pro

## Taurus 5

Width: 320 cm.

Height: 180 - 200 cm.

Depth: 580 cm.

Packed size: 73 x 35 x 30 cm.

Total weight: 13.5 kg.

# Orion 4

Extra features with added value

The Orion is a great starter tent, with added features and benefits. It features the excellent **Air Erect System** which ensures that the tent is extremely easy to use, erect and live with.

The use of the 3 layered system means that this tent is durable, stable and easy to erect with each individual tube only taking around 10 pumps to inflate.

The use of the **HydroDore SL** fabric keeps the weight down whilst delivering a great performance, helping keep it easy to use, store and pack away.

The tent can be erected by a single person in minutes and being so lightweight is extremely easy to carry and store when not in use. It includes a large breathable inner tent in the rear with built in ventilation to keep it cool and useful storage pockets to the front.

You have a front and side door canopy to help keep the rain out when the doors are open and fully screened front and side doors to help keep those bugs out when the weather is nice.

The tent can be erected by a single person in minutes and being so lightweight is extremely easy to carry.

## Features

- Air Erect System
- Independent inflation points
- HydroDore SL fabric
- Lightweight and small pack size
- Quick and easy to erect
- Can be erected by one person
- Front and side door canopies
- Full ventilation front and side doors
- 3 Way side window (half window, half mesh, full external blind)
- Clear view windows
- Fully tubbed groundsheet
- Organiser pockets on front and inside of inner tent
- Internal blinds
- Electrical inlet

## Details

- Warranty: 12 months
- Berth: 4
- Fabric: HydroDore SL
- Windows: Superclear Transparent Foil
- HH: 3000 mm

## Optional Extras

- Footprint
- Comfort carpet
- High volume, easy glide, bravo pump
- Universal canopy pole kit
- Quest serial LED light
- Quest LED lighting strip
- Windshield Pro

## Orion 4

Width: 265cm.

Height: 165 - 180 cm.

Depth: 450 cm.

Packed size: 73 x 34 x 23 cm.

Total weight: 13.5 kg.

# Lyra 4

Value for money, air ease of use

The Lyra is the perfect starter tent. It features the excellent **Air Erect System** which ensures that the tent is extremely easy to use. The use of the 3 layered system means that this tent is durable, stable and easy to erect with each individual tube only taking around 10 pumps to inflate.

The use of the **HydroDore SL** fabric keeps the weight down whilst delivering a great performance, helping keep it easy to use, store and pack away. The tent can be erected by a single person in minutes and being so lightweight is extremely easy to carry and store when not in use.

It includes a large breathable inner tent in the rear with built in ventilation to keep it cool and useful storage pockets to the front.

You have a large roll up front canopy which can be used as a sun canopy with the optional canopy pole kit. The side door can be rolled back as well giving you plenty of access when required.

The fully tubbed groundsheet which keeps the weather out, but it has peg down doorways to the front and back allowing you to peg them flat removing the trip hazard and giving you easy access for wheelchairs, walkers and more.

## Features

- Air Erect System
- Independent inflation points
- HydroDore SL fabric
- Quick and easy to erect, can be erected by one person
- Front panel can be rolled up or used as a sun canopy
- 3 Way side window (half window, half mesh, full external blind)
- Clear view windows
- Fully tubbed groundsheet with peg down groundsheet entrances
- Organiser pockets on front and inside of inner tent
- Roll up side door
- Internal blinds
- Electrical inlet
- Lightweight and small pack size

Height: 165 - 180 cm.

Depth: 450 cm.

Packed size: 73 x 33 x 22 cm.

Total weight: 11.5 kg.

# Screen House 6

One person, one minute

Available in two sizes this is simply the quickest, easiest and best gazebo on the market. This is the screen house 6. It has 6 sides and is built and designed so one person can erect (or take it down) in less than one minute.

There is nothing to build, put together, tension or inflate you simply take it out of the bag, unfold it and pull/push the sides and roof and it springs into position - fully set up ready to peg.

It is also sturdier than other gazebos. It comes with pegging points on every corner and in the middle of each

side giving you great ground anchorage. It also comes with storm straps to connect to every side ensuring it stays up in adverse weather and makes it sturdier than any gazebo you are used to.

The mesh panels are built in, these help keep you warmer by stopping the wind chill, but allow the air to flow ensuring you can cook inside if you wish. The roof is waterproof so it keeps the water off and the U.V. coated **Quest Tec 210** material gives you a U.V. rating of 50+ keeping you safe from the sun's rays and keeping it cooler in the sun.

## Features

- Available in two sizes
- Easiest to use shelter on the market
- Stronger and more stable than its rivals
- Nothing to assemble, tension or inflate
- Full Quest PMesh sides, high grade max strength mesh
- Warmer in the wind, Cooler in the sun
- U.V. coated
- Storm straps for every side
- Fully zipped and meshed double front door
- Extra pegging points on all sides
- Large pegs for all pegging points
- Waterproof roof
- Extremely easy to put into bag
- Side panels can be used in conjunction with canopy pole kit to create shaded areas outside of the screen house

## Details

- Warranty: 12 months
- Fabric: Quest Tec 210
- Sides: Quest Mesh : High grade max strength mesh
- Frame: solid fiberglass
- HH: 2000 mm (roof)
- U.V. Rating: 50+

## Optional Extras

- Sidewall Blinds (pair)
- Breathable flooring
- Universal canopy pole kit
- Quest LED lighting
- Quest LED lighting strip
- Windshield pro

# Utility

## Storage, shower or toilet made easy

Available in two sizes, the standard version or the large version. It can be used as a simple storage tent, or an easy to use shower tent, your own private toilet tent, a great fishing shelter or even the perfect small utility tent.

The standard version is 150 x 150 cm whilst the large is an impressive 250 x 250 cm. Both sizes are erected the same way, either can be done in a matter of seconds. These really are the quickest and easiest utility tents available.

It can be erected by one person in a matter of seconds, is lightweight, easy to carry and store. There is nothing to put together, nothing to assemble, you just take it out of the bag, put it onto the floor and open it up. The frame locks in position so you don't even have to tension it, everything is done for you, as easy as 1-2-3.

The removable floor allows it to be used as a toilet tent and the addition of the utility shelf allows it to be used as a shower tent.

### Features

- Available in two sizes
- Designed to be erected by one person
- Only takes seconds to erect
- Also only takes seconds to take down
- Perfect for a shower tent, toilet tent, utility room, storage tent and more
- Extremely lightweight
- The zero tension frame system means that you do not have to tension the canvas the frame tensions it for you automatically once locked in position.
- Easy lock poles
- U.V. coated fabric
- Floor can be hung up out of the way when not required
- Includes shower shelf for use with solar shower (not supplied)
- Fully zipped front door
- Entire utility tent fits easily inside one small bag
- Complete with pegs and guy lines

### Details

- Fabric: 190T U.V. Coated Polyester
- Frame: Zero tension coated steel
- U.V. Rating: 50+

### Optional Extras

- Quest serial LED light
- Quest LED lighting strip

Total weight: 5.5 kg.

### Large Utility (250)

Size: 250 x 250 cm.  
Height: 210 - 225 cm.  
Packed: 17 x 17 x 116 cm.  
Total weight: 6.5 kg.

# Windshield Pro

The ultimate windbreak

The Windshield Pro is the very best windbreak available. It is lighter than its rivals, more extendable than its rivals and more secure and stable than its rivals.

It has a patented frame system that has been designed with one job, to deliver the very best windbreak possible. The Windshield Pro can be slid into your caravan (or motorhome) awning channel (if available) allowing you to come directly off the vehicle.

The frame system locks itself in place making it easier to erect and more sturdy when in use. The unique frame

system means no guy lines are required and the entire frame system can be placed on one side of the windshield ensuring you have absolutely no trip hazards and you get to use 100% of the space available.

It can be extended with a door, an additional panel and now a weather shade giving you an amazing amount of options. The windbreak is designed to go right down to the ground and with its additional pegging points held down making a secure and safe place on the inside, perfect for pets and children.

## Features

- Protection from the sun and wind
- Extendable to any size
- Can be pegged in various different shapes
- Lightest in its class
- Unique pole system means no guy lines
- Easier to use than guy line versions
- Extremely sturdy and stable
- Viewing windows in every panel
- Use 100% of your space
- No trip hazards
- Fabric comes right down to the ground
- Pegging points at the corner of every panel and additional ones in the centre of each panel
- Floor plates for added stability
- Can be connected directly to a caravan
- Can connect to another Windshield
- Additional panels available
- Additional door panel available
- Additional weather canopy available
- Comes in its own premium carry case
- Ground spikes in every vertical pole

## Details

- Warranty: 12 months
- Fabric: HydroDore SP
- Frame: Frosted coated aluminium
- Windows: Super clear transparent foil

## Optional Extras

- Additional extension panel
- Door panel
- Sun / Barbecue cover
- Quest LED lighting strip

- **Stow** : Large all aluminium frame that folds in the middle to form its own carry case.
- **Shipston and Burford** : Extremely lightweight quick folding legs.
- **Witney** : Low level table that folds in half to make an amazingly small pack size.

# Accessories: Annexes & Inner Tents

Annexes and inner tents are the perfect addition to an awning to help increase space and sleeping areas. By adding an annex onto an awning you are immediately giving yourself extra space which can be used for anything from storage, to sleeping to somewhere to keep the pets. Inner tents add that essential second skin when sleeping in an awning or tent. They give you extra protection from the elements, ensure you do not get wet from condensation and give you a defined area to sleep.

By selecting an original annex or inner tent you not only ensure you get the same high level of manufacture you get in your awning or tent, but you also get the added benefit of knowing that they will fit and work where you want.

## Performance poled annex

- Fits Omega and Aires awnings
- Rear entrance
- Fits either side of awning (or have 2 on a single awning)
- HydroDore XT Pro fabric
- Single aluminium pole
- Size: 230 x 210 cm\*

# Accessories: Flooring, poles, straps and more...

By adding flooring to your awning, tent or screen house you are giving yourself extra comfort, performance and protection against the weather. In awnings the flooring has to be breathable, but still gives you extra comfort and insulation from the ground. The flooring inside tents does not need to be breathable so it is just about comfort. In addition to annexes, inner tents and flooring we have a number of additional accessories aimed to help you make your awning, tent or screen house more resilient to the weather,

such as extra storm poles or strap to give better ground anchorage or make the awning stronger. Better protection from the wind, such as rear poles for awnings which hold the rear pads in place, helping to stop the wind blowing in from the side. Or even just making it easier to use your awning or tent, such as single inflation kits to allow you to inflate your awning from one point, or a high volume pump to make it even easier to inflate and not forgetting lights to help light up your awning, tent or gazebo.

## Just released for 2018

- The new Quest Media Arm. Give your chair the ability to hold your smartphone, tablet or e-reader

## Performance Breathable flooring

- Perfect for your awning or screen house. Multiple sizes for any of the models. Generic size can be used for any awning or Gazebo.
- Breathable, durable and hard wearing
- Extra comfort and isolation from the ground
- Sewn edges for extra strength and durability

## Comfort carpet

- Perfect for your tent. Gives you extra comfort on top of the built in groundsheet. Sized to fit the tent living area.
- Soft and comfortable underfoot
- Can be left in position in tent, even when packing away.
- Can be removed to be cleaned separately

## Single inflation kits

- These turn your multi-inflation awning into a single inflation awning.
- Adds strength and stability
- Allows you to inflate your awning from one single inlet

## Rear poles

- Used to push the rear pads against the side of the van helping to seal it against the van to stop draughts coming in from the side.
- Gives you better protection against drafts
- Very simple and quick to use
- Puts pressure down the entire length of the pad

## Universal canopy pole kit

- Consists of 2 poles, 2 guy lines and 2 pegs.
- Allows you to convert a roll up door or panel to a sun or weather canopy.
- Quick and easy to use
- Allows you to create a canopy where you didn't have one before

## Drive away kit

- Is used in conjunction with a drive away awning and a roll out canopy.
- Allows you to disconnect your awning from your van without having to unpeg it.
- Can be cut to size
- Makes it easier to connect and disconnect from your van
- Versions for both 4mm and 6mm channels

## Storm poles & Straps

- Storm poles and straps are an easy and quick way of adding extra strength and stability to your awning. They can remove some of the movement, bend and flex that you get in an air awning.
- Very quick and easy to use
- Adds stability and strength

## High volume pump

- Very simply an exceptionally easy pump to use.
- Quick to inflate your air awning or tent.
- Built in pressure gauge
- Single or double inflation - you decide
- Complete with dump valve to ensure no over inflation

## Lighting

- We have different lights available to give you the best possible options.
- LED lights that can be placed inside sleeves in our LED ready awnings.
- LED serial lights that can be plugged together (up to 3) and run off a single plug
- Bulk head style lights to match the ones on the side of your van.
