

The Kampa logo is displayed in white text on a blue rounded rectangular background. The letter 'K' is stylized with a large, sweeping tail that extends downwards and to the left.

# Caravan Awnings

EN

2019

## There's a Kampa awning for everyone

No one has more experience of lightweight and inflatable awnings than Kampa. We understand that your awning is an important extension to your caravan and you would like the same quality, design and ease of use that your caravan gives. Kampa awnings provide first class accommodation on site, the simplest set up and take down and structurally are the most secure.

Our newest innovations bring you the very latest enhancements and introduce new models to ensure that Kampa awnings remain the very finest available. These bestselling awnings have been further developed to ensure that they offer the highest quality design, materials and function. You will be proud to pair your caravan with a Kampa awning.

2019 sees the introduction of new features across many awnings in both our poled and inflatable ranges. We've followed up the successful launch of the Ace AIR All-Season, our first seasonal pitch inflatable awning, and the Rally AIR Pro Grande, a spacious three metre deep awning, with the Grande AIR All-Season, a brilliant combination of the two. This year also sees the introduction of the Club AIR Pro awning, an entirely new design of inflatable awning which effortlessly combines form and function. Familiar styling, rigid construction, and a striking front apex set the Club apart, an instant Kampa classic. Our poled rally and Rally Pro models have also been significantly improved, featuring lightweight aluminium frames for reduced weight and easier handling.

### Grande AIR All-Season

New for 2019, a seasonal pitch awning where versatility is assured. Optional extensions can be fitted to either or both sides. Available in 330 and 390 sizes.

Page 12

### Ace AIR Pro

Europe's most sought-after awning, offering great style whilst remaining completely functional. Available in 300, 400 and 500 sizes.

Page 16

## Ace AIR All-Season

Perfect for seasonal pitches or extended stays in sunny climes. The ultimate in style and durability.

Page 10

## Frontier AIR Pro

If it's space that you require then the Frontier will meet all your requirements. Available in 300 and 400 sizes.

Page 14

## Club AIR Pro

New for 2019, the Club's modern yet classic styling is certain to turn heads. Available in 330, 390 and 450 sizes.

Page 18

## Club AIR Pro Plus

New for 2019, the Club Plus offers all the features and functionality of our new Club awnings with an integral extension for extended living space.

Page 20

## Grande AIR Pro

Building on the success of our famous Rally models, but with a huge three metre depth. Available in 330 and 390 sizes.

Page 22

## Rally AIR Pro Plus

All the great features of our bestselling Rally AIR Pro but with a large built-in side extension. Perfect for storage, sleeping, living and as a wet weather entrance. Available in 260 and 390 sizes.

Page 24

## Rally AIR Pro

Europe's best-selling inflatable awnings. There's a size to suit all caravans and needs. Available in 200, 260, 330 and 390 sizes.

Page 26

## Sunshine AIR Pro

A simple product made even simpler with the inclusion of our inflatable technology. Available in 300 and 400 sizes.

Page 28

## Store/Store AIR

New for 2019, a free-standing storage solution. Available with an aluminium or inflatable frame.

Page 29

## Pop AIR Pro

Essential extra space for pop-up caravans – the Pop AIR is the first purpose-made inflatable awning. Available to fit the Eriba Touring range but also suits other pop-up caravans.

Page 30

## Revo Zip

A speedy roll-out awning with the option to quickly zip on a Privacy Room.

Page 32

## Ace Pro

The ultimate in lightweight poled awning design. The Ace is a stylish addition to your caravan and provides loads of fantastic living space. Available in a 400 size.

Page 34

## Rally Pro

An incredibly high specification awning. Available in 200, 260, 330 and 390 sizes.

Page 36

## Rally

The famous Rally in its updated format is now even better value than ever. Available in 200, 260, 330 and 390 sizes.

Page 38

## Accessories and Options

Kampa awnings can be customised to suit your own needs. We offer a comprehensive range of optional equipment that can be ordered with your awning.

Page 39

# Kampa AIR Awnings

## The future in your hands

Kampa AIR awnings have revolutionised caravanning. Our AirFrame system is trusted by tens of thousands of caravanners owners across Europe and further afield. Gone are traditional metal or fibreglass poles, replaced by a strong, high pressure inflatable AirFrame system. No more struggling with the awning frame and trying to find the correct pole, our AirFrame is already attached to the awning for simple one step set-up.

## How does it work?

It's simple – traditional poles have been replaced with an inflatable AirFrame that is always attached to the awning. Individual AirPoles are linked together allowing for the entire awning to be inflated from a single inflation point. This rigid AirFrame results in an exceptionally strong awning, probably stronger than a steel frame. Each awning comes supplied with a high-volume hand pump and with this pump a Rally AIR Pro 260 can be fully inflated in less than 60 seconds. For the ultimate in ease our optional Gale electric pump is also available.

## What's the set-up procedure?

It's never been easier, just follow these simple steps:

- 1) Thread the awning onto the awning rail of your caravan. Kampa AIR awnings are lightweight making it much easier than a conventional awning. All Kampa AIR awnings have zip-out panels that can be removed to reduce the weight further.
- 2) Peg down the four corners of the awning.
- 3) Attach the pump to the inflation point and pump until inflated.
- 4) Peg down the intermediate pegging points and guy lines.

**That's it! The easiest awnings ever.**

## Other advantages

- As well as being the easiest awning to set-up, they're also the easiest to take-down.
- Kampa AIR awnings are lighter than awnings with conventional poles.
- With no metal or fibreglass poles there's nothing to damage your caravan. Soft AirPoles rest against your caravan with no other attachment.
- The AirFrame is always attached – you're never going to forget or lose your poles.
- Whilst the AirFrame is very rigid, it can flex in the wind meaning that you'll never break or bend a pole.
- Our AIR awnings are made with class leading materials and are produced by skilled craftsmen.

\* see website for details

## The Kampa AirFrame Advantage

The AirFrame is incredibly durable and under normal conditions will not fail. Each AirPole is made of a strong TPU inflation tube that is zipped into a tough reinforced Oxford Polyester/PE cover which is then zipped into a heavy duty polyester sleeve in the awning. The AirPoles are well protected and need no maintenance. Whilst tested to 22 psi, the AirFrame system best functions when inflated to 9 psi and is suitable for both hot and cold climates as well as extreme changes in temperature. This is substantially higher than other inflatable awnings and ensures that Kampa AIR awnings are the strongest and most stable available.

## Why buy a Kampa AIR awning?

### Experience

Kampa are pioneers and world leaders in inflatable awning technology. We're the market leaders and have extensive knowledge and experience. The people behind Kampa awnings have over forty years of continuous expertise in awning design. Since we launched our inflatable awnings in 2013, tens of thousands of caravanners across the world have the benefits of a Kampa AIR awning.

### Technology

No awning is quicker or easier to set up than one of our inflatable awnings. All Kampa AIR awnings inflate from just one external inflation point. That's one inflation point from where the whole awning is inflated – there are no additional poles to inflate individually and insert. Kampa AIR awnings are the easiest to take down too. The AirFrame is integral and remains in situ, each AirPole is connected meaning there is no need to individually deflate each AirPole. The entire awning is deflated through quick release deflation valves at the base of each leg.

### Choice

Kampa offers the most comprehensive range. For 2019 we have over twenty-five different inflatable caravan awnings, available in an array of sizes to suit your needs. Whether you need an awning for a weekend away or for a seasonal pitch, Kampa has a model for you. Customise your awning with our range of optional equipment including annexes, carpets, roof linings and our fantastic SabreLink lighting system.

Whilst tested to 22 psi, the AirFrame system best functions when inflated to 9 psi and is suitable for both hot and cold climates as well as extreme changes in temperature.

As the AirFrame system can cope with extreme changes in temperature, Kampa awnings do not use 'pressure relief valves' as these would unnecessarily expel air from the awning, reducing the stability and requiring more air to be added.

The below chart displays how the air pressure in the AirFrame will vary in different temperatures:

AirPole Pressure	Temperature
12.0 psi	50°C / 122°F
10.5 psi	40°C / 104°F
9.7 psi	30°C / 86°F
<b>9 psi</b>	<b>20°C / 68°F</b>
8.2 psi	10°C / 50°F
7.5 psi	0°C / 32°F
6.7 psi	-10°C / 14°F
5.9 psi	-20°C / -4°F
5.2 psi	-30°C / -22°F

An awning inflated to 9 psi at 20°C (68°F) will only increase to 10.5 psi at 40°C (104°F), well within the awnings tested maximum air pressure of 22 psi.

# More reasons to buy a Kampa awning

Kampa awnings have upright front wall panels allowing full use of the interior space. The front headroom is exceptional, allowing an unobstructed view out. They also offer a generous depth.

Large Crystal Clear windows ensure a great view out. All windows come with internal blinds or curtains on easy-slide track for privacy.

The easiest set up. Whether it's inflatable or poled, Kampa awnings are the easiest to set up. The whole operation can be achieved in minutes.

Our awnings have strong mudwalls with integral eyelets to keep out draughts.

Kampa zips are heavy duty and won't let you down.

All Kampa AIR awnings come with our Downdraught pump. The pump is taller so you don't need to bend down as far. Because it only works on the down stroke, it requires a lot less effort – you'll certainly notice the difference. The pump has more comfortable hand grips and a built in pressure gauge, so you'll know when you've reached the correct pressure.

Kampa awnings can be customised with the widest range of optional equipment including organisers, mesh panels and roof linings.

Where applicable our caravan awnings come with a skirt to prevent draughts from under the caravan.

## So simple to set-up!

# Our Materials

## WeatherShield™ Four-Season

Tested in the sunniest parts of Australia and the wettest places in Europe to make sure it's able to cope with extended exposure to the elements. The material is breathable and extremely durable.

## WeatherShield™ 4-SEASON

## WeatherShield™ PRO

## WeatherShield™ Pro

Our iconic fabric that we use extensively throughout the range has proved itself time and time again. We've made improvements to the UV protection and the coatings to make sure that WeatherShield™ Pro continues to be market leading.

## WeatherShield™

Durable and extremely weather resistant, this material's been protecting caravanners since 2008. We've improved the coatings to make it even better.

## WeatherShield™

## Dual Pitch™ ROOF SYSTEM

# Dual-Pitch

Dual  
Pitch  
ROOF SYSTEM

## Dual-Pitch Roof System

### Another innovation from Kampa.

Awnings with Kampa's Dual-Pitch Roof System have much better interior headroom, making Kampa awnings more spacious and useable than any other inflatable awning on the market.

The taut Dual-Pitch roof line is also designed to perform. The pole structure of each roof has been carefully constructed to ensure that wind is deflected and rain water is shed efficiently, helping prevent puddling on the roof and thereby enhancing the performance.

# Kampa®

ALL SEASON

## ACE AIR 400

### - an awning for all seasons

If you want a seasonal pitch awning that is just as easy to set up as our other inflatable awnings, then this is the awning for you. The Ace AIR All-Season has been designed to be set up for extended periods of time and every component has been selected to cope with extremes of weather. The Four-Season fabric has been tested in the hottest, sunniest parts of Australia to ensure that it's suitable for use in this awning. The Ace AIR All-Season features our latest Dual-Pitch Roof System and double mud wall, ensuring it stands up to the worst of the weather.

This awning has all the features of our Ace awnings but also comes with a protective canopy, exterior roll back blinds on all windows, a washable base panel and a storm tie-down kit as standard.

## GRANDE AIR

### - versatility assured

New for 2019, a seasonal pitch awning incorporating all the advantages of our famous Rally AIR models that have made them Europe's favourite inflatable awnings, but with a huge three metre depth. The Grande AIR All-Season is designed to be pitched for extended periods and every component has been selected to cope with extremes of weather. Utilising our Four-Season fabric, this awning is sure to not let you down.

With the Grande AIR All-Season, versatility is assured. Optional extensions can be fitted to either or both sides. Simply zip-on and inflate. Each extension increases the total awning width by 1.9 metres whilst maintaining the awning's generous height and depth throughout.

# Kampa® PRO FRONTIER AIR

Frontier AIR Pro 400

## - space and elegance

If it's space that you require then the Frontier will meet all your requirements as it's one of the largest awnings available. The Frontier 400 is eight metres wide yet it only needs a caravan with a horizontal awning rail of just over four metres. The Frontier 300 is seven metres wide yet it only needs a horizontal rail of just over three metres. The maximum depth of both sizes is an impressive three metres.

As with all Kampa AIR awnings, the Frontier is inflated through a single inflation point and the front panels can be removed to make it easier to thread the awning onto the caravan. Once set up you can revel in the large open inside space with loads of room for furniture and all your other caravanning paraphernalia.

All the centre panels can be zipped down, veranda style, rolled to the side as a doorway or completely removed. You can zip in mesh panels for those hot days when you want to keep the insects out and these can remain in situ behind the front panels. Each of the end extensions has its own front door and a window in the rear panel so, if the extension covers your caravan window, you can still see out into the awning. The rear panels also have zipped access for any lockers behind them.

Windows in both rear panels allow a clear view out of the caravan.

# Kampa<sup>®</sup> PRO ACE AIR

## - perfect from all angles

Europe's most sought-after awning. The Ace AIR Pro offers great style whilst remaining completely functional - you're certain to be the envy of the caravan park. The shaped front panels not only look great but provide extra interior space with a depth of 300cm.

Large panoramic windows and skylights provide ample light during the day and an excellent view of the stars at night. The Ace AIR Pro benefits from our Dual-Pitch Roof System and large mesh window panel, providing relief in hot weather.

If weight is an issue the wall panels can be zipped out so that it's only necessary to feed the roof through the awning rail before zipping the wall panels back into place. The side wall panels can also be replaced with one of our superb inflatable annexes.

The Ace AIR Pro is available in 300, 400 and 500 sizes and these can be complemented by the spectacular Sun Wing that is available for each of the sizes.

## CLUB AIR

### - join the club

New for 2019, the Club AIR Pro's modern yet classic styling is certain to turn heads. Combining form and function, the Club AIR Pro's Dual Pitch roof boasts a striking front apex, offering a unique aesthetic and providing masses of headroom too. Windows and skylights provide ample light, whilst the convenient 2.75 metre depth means you'll never be short on space.

Plenty of ventilation can be found throughout the awning to maintain airflow and provide relief in hot weather. The front and side panels can be completely zipped out and mesh panels and annexes are available as optional equipment. As with all Kampa AIR awnings, the Club AIR Pro is inflated through a single inflation point.

# RALLY AIR PLUS

### - when you need more room

All the features and functions of our Rally AIR Pro with a bit more space. The integral Plus extension is the ultimate in versatility – use it as a wet weather entrance or somewhere to kick off your shoes, or simply for extra living space when you're entertaining. Add the new Sleep-Tite optional inner tent to provide comfortable accommodation for your guests. The awning can be left divided or you can remove the side panel to create one large area.

The extension is inflated at the same time as the rest of the awning through the same inflation point making it as easy to set-up as the rest of our awnings. If the extension covers a caravan window you can open a flap on the rear panel to reveal a window, allowing unimpeded access into the awning from the caravan and the entire rear panel can be rolled back to allow access to any lockers that may be covered by the extension. The Rally AIR Pro Plus is available in 260 and 390 sizes and can be ordered in left and right hand versions (looking at the front of the awning).

Rally AIR Pro 390

## - updated version of our bestselling favourite

The Rally AIR Pro is quite simply the bestselling inflatable awning in the world. The latest model brings even more features and ensures the Rally AIR Pro remains market leading. Interchangeable zip-out side panels allow the fitting of an annexe or conservatory and the reversal of the side doors – from the back of the awning, to the front.

Benefiting from our Dual-Pitch Roof System, the Rally AIR Pro offers generous headroom. A large mesh secondary panel behind the right-hand side window provides relief in hot weather. All Rally AIR Pro awnings can be fitted with optional front mesh panels, providing additional ventilation whilst keeping the bugs out and the awning comes ready to accept our Limpet Fix System – an ingenious method of attaching the side walls to the caravan. Available in 200, 260, 330 and 390 sizes.

# Kampa<sup>®</sup> PRO SUNSHINE AIR

## - here comes the sun...

The traditional sunshade is made even simpler and safer with the inclusion of our Kampa AirFrame. Sunshades are notorious for catching the wind and, in the worst-case scenario, damaging the caravan. There's no such problem with the Sunshine AIR Pro, the AirFrame inflates in seconds and will never damage the caravan.

We've gone one step further for 2019 by enhancing the Sunshine AIR Pro with optional Sidewall Sets. After a speedy set-up, the Sunshine provides a generous sheltered area; perfect for sitting back and enjoying the vista on long summer evenings.

# Kampa® STORE

## - storage made easy

New for 2019, the Kampa Store and Store AIR offer a free-standing storage solution. Generous dimensions make it perfect for keeping your awning clear of furniture and bikes, or for creating the ultimate camping kitchen. The left-hand side can be unzipped and rolled up and features a fixed opaque window. The right-hand side incorporates a large mesh panel with an opaque cover allowing the breeze in on a hot day. This right-hand side panel can also be guyed open to provide weather protected ventilation (guylines not supplied).

The Store's premium material, hard wearing exterior mud wall ensures all your holiday gear is kept safe and well protected from the elements. For extra security up to four optional storm tie-down straps can be fitted.

Available with an aluminium or inflatable frame.

## POP AIR

### - for Eriba Touring and other pop-up caravans

The inflatable awning solution for your Eriba caravan. There are four sizes specifically designed to fit the different sized Eriba Touring caravans, but these will also fit other pop-up caravans depending upon their height and length. The Pop awnings have a clever dual height system that means that they will fit pre and post 2010 models (260 Puck model only pre-2010).

Freshly updated for 2019, the Pop AIR Pro now allows for the fitting of an optional Sun Canopy to the front of the awning as well as an optional Pop Annexe to replace the right-hand side panel. The rear of the awning has an extra inflatable tube that raises the centre height making it a full height awning with plenty of headroom and a light airy feel. The Pop AIR Pro has plenty of windows for a great view out and closable mesh panels provide ventilation where needed.

Due to the design of Eriba caravans and the fitment of the awning, we recommend the use of our optional Eriba Weather Protection Strip. This simply clips to the caravan gutter and prevents rain running into the gully between the caravan and awning.

# REVO ZIP

roll-out awnings

## - roll-out in style...

The Revo Zip offers an alternative solution to our other caravan awnings. It can be left permanently attached to your caravan or motorhome, freeing up storage space and speeding up set up. Once fitted, just open the bag zip, roll the awning out and deploy the two front legs and the two rafters – it's as simple as that. Take down is just as quick. If you're looking for more than just a sunshade, the Revo Zip can be quickly fitted with a Privacy Room that provides comfortable accommodation and protection from the elements.

## Why buy a framed Kampa awning?

Although they are becoming increasingly popular, we understand that not everyone wants an inflatable awning. Kampa pioneered premium quality poled awnings and they quickly became the bestselling awnings of their type.

There's a Kampa poled awning to suit most budgets, from the original Rally through to the Ace - would you really want anything less on your caravan? No other lightweight awnings are so advanced in their design and quality or as easy to set up as a Kampa.

These conventionally framed awnings are unique in offering adjustable front legs, these are absolutely essential to ensure a good fit between your awning and caravan. The diagram explains why your poled awning should have adjustable legs.

### Poled awning without adjustable legs

When the ground slopes upwards away from the caravan, the front legs are pushed upwards pulling the back of the awning away from the caravan.

When the ground slopes downwards away from the caravan, the front legs drop making the back of the awning too close to the caravan.

### The advantage of adjustable legs on the Rally

When the ground slopes upwards away from the caravan, the legs can be made shorter maintaining a close fit against the caravan.

When the ground slopes downwards away from the caravan, the legs can be made longer maintaining a close fit against the caravan.

# Kampa<sup>®</sup> PRO ACE

## - a new twist

As well as inflatable technology, Kampa are at the forefront of conventional awning design. The Ace Pro showcases all that's best in lightweight awning design and function. The awning is 400cm wide and a very generous 300cm deep, big enough for an extended holiday and an ideal replacement for a full awning whilst remaining simple to set up and is no more difficult than one of our smaller poled awnings. All front and side panels can be zipped out and an optional annexe can be zipped into either or both sides.

The view out is amazing, through the skylights in the roof and the large panoramic windows. Unusually, for a lightweight awning, the Ace Pro comes with conventional curtains that gives an impression of sheer elegance. The Ace Pro is designed to accept all our latest options including a roof lining and the accessories that attach to the fitted AccessoryTrack™. To keep the payload down the frame is manufactured in aluminium.

# Kampa<sup>®</sup> PRO RALLY

## - for the most discerning

For the discerning caravanner who demands the finest lightweight awnings we have combined the superlative features of classic and lightweight awnings to produce a hybrid that gives you the best of both worlds. The awning is produced in extra-high quality Weathershield™ Pro material that looks and feels like a traditional material but has all the benefits of modern technology.

We've made improvements to the latest models to ensure that the Rally Pro remains the best lightweight awning available. Refreshed for 2019, the Rally Pro now features an aluminium frame, drastically reducing the weight of the awning and preventing corrosion. The front legs remain adjustable to ensure a perfect pitch every time.

The Rally Pro is available in a striking Grey/Charcoal colour combination; this look is complemented by the curtains, for both the front and side windows, that slide on an easy-run track. There's a Rally Pro awning to suit all caravans and purposes, whether it's the 200 for a quick weekend away or the 390 for an extended holiday. Whichever size you choose you can be sure that it's quick and easy to set-up.

Zip-out side panels offer even more flexibility. The side panels are interchangeable, allowing you to change the door positions on your awning and an optional annexe can be zipped into either or both sides. The annexe is also simple to set-up and comes complete with an inner tent. It creates excellent additional accommodation or can be used for extra storage.

Further customisation is available with our range of optional equipment including our organisers and hanging rails that can be attached to our AccessoryTrack™, pre-fitted to all Rally Pro awnings.

2019

ALUMINIUM  
FRONT UPRIGHT  
POLES

- the original  
and still the best

The awning that started it all and spawned all other Kampa awnings. Its DNA can be seen throughout the range. Refreshed for 2019, steel front upright poles have been replaced with aluminium, lightening the load and preventing corrosion. The Rally retains its unique adjustable front legs, ensuring a perfect pitch every time. This is the latest format, available in four very useful sizes. From the compact 200, useful for weekend and overnight stays, right up to the full size 390, which is ideal for a large family and be used as a replacement for your traditional awning. Whatever the size, they're all incredibly lightweight and easy to set up with the majority of the set-up done from the outside of the awning. As with all Kampa awnings, the Rally is made from premium materials that will never let you down. It's quick to dismantle and packs into an oversized carry bag with compression straps.

## AIR BREAK

### - breaking new ground

The world's first inflatable windbreak. Simply peg and pump, never has a windbreak been easier to set-up! The AIR Break Pro can be used free-standing or connected to the front of our awnings to create a fully enclosed area – great for keeping dogs in!

Utilising our unique AirFrame system with single point inflation, the AIR Break Pro is surprisingly sturdy in the wind and its striking colour combination and use of Weathershield™ Pro material make it a great match for our AIR Pro awnings. A window panel runs throughout the windbreak allowing visibility out.

The AIR Break Pro is available in 3 and 5 panel versions. The AIR Break Pro 3 is designed to fit awnings between 200 to 330 cm wide and the AIR Break Pro 5 is designed to fit awnings between 330 to 500 cm wide.

Model	Awning Width	AIR Break Pro Depth*

# Kampa<sup>®</sup> PRO WINDBREAK

- better than ever

The Pro Windbreak gives you vital protection from the wind. Made in the same material as our Pro awnings, it is quick to set-up and is supported with adjustable support bars. The windbreak provides a level of privacy and Crystal Clear transparent panels mean that you're not completely cut-off from your surroundings.

Improved for 2019, the Pro Windbreak now features an aluminium frame; this massively reduces the weight of the windbreak and helps prevent corrosion. Additionally, Pro Windbreaks can now be connected using figure-of-8 strips (AC0325), to create a larger protected area. If you wish to create an enclosed area, a zip-up door panel is also available to allow access.

Model	Code	Height	Length	Pack Size cm	Weight

Carpets designed to fit your awning

### Key Features of Kampa Carpets

- Breathable fabric ensures that underlying grass is not killed
- Close-weave allows air to circulate whilst stopping insects, worms and worm casts from coming through
- Exceptionally hardwearing, rot proof and UV stabilised
- Easy to clean - just hose down

### Elegance Carpet

- Hard-wearing
- Attractive three-tone weave
- Can be trimmed using scissors
- Warm, non-slip finish
- Complete with carry bag

### Continental Cushioned Carpet

- Heavy duty but lightweight
- Attractive striped weave in contemporary colours to complement your awning
- Warm, cushioned non-slip finish
- Very easy to fold
- Complete with carry bag

### Easy Tread Carpet

- Hard-wearing with attractive two-tone weave
- Warm, non-slip finish
- Hemmed for extra strength
- Complete with carry bag

Luxury, breathable carpets available for every model

# SabreLink™ - the effective lighting solution for your awning

An exciting accessory for your awning, the SabreLink™ lighting system ensures you're never in the dark. The system allows you to link up to three lights together - that's 450 LED's. Each of our AirFrame awnings is SabreLink™ ready and can accept lights on the front AirPoles and also the centre poles. An Ace AIR Pro 400, for example, could have three lights along the front and another three in the centre. Each system is controlled using a remote control that allows you to switch the lights on and off and also dim and brighten them. In our poled awnings the lights can be hung from the horizontal poles using the 'S' hooks provided.

**Sabre LINK™**  
SYSTEM

## SabreLink™ Specifications

- Available as Starter and Add-On kits
- Up to three lights can link together
- Operated using a remote control
- Brightness can be adjusted
- Velcro tabs on all Kampa AIR awnings from 2016 for easy fitting
- Can be hung in other awnings using the hooks supplied
- 150 super bright LED bulbs - never need replacing
- 5 metre cable (Starter kit)
- 1.2 metre long
- Complete with mains adaptor in Starter Kit (Euro version available)
- S-hooks included for other awnings and tents

## AccessoryTrack™ Hanging Rail

Attaches to the AccessoryTrack™ on some of our awnings. Provides essential hanging space and can be used with our Jack Hanger to provide hooks (as shown).

Code | CE740357 |

## AccessoryTrack™ Organisers

There's never enough storage space in an awning, so these handy organisers are perfect for smaller items helping keep your awning tidier and your essential holiday items easier to find. The organisers simply slide onto the AccessoryTrack™ on selected models.

CE7460

Organiser	Code	CE740359
Pro Organiser	Code	CE7460

## Wheel Arch Covers

Available in single and double sizes. Includes storage pockets. Simple to fit using the Limpet™ Fix System.

Code	AC0330 (single grey)
Code	AC0331 (single black)
Code	AC0332 (double grey)
Code	AC0333 (double black)

## Pro Organiser Draught Skirt

Make use of the space under your caravan by utilising the two large storage compartments and two useful pockets. Length: 4-6m (cut to length) / 60cm drop.

Code | AC0304 |

## Hanging Rail (front to rear)

Provides vital hanging space for towels, jackets and clothing. Ideal for use with our optional Jack Hanger (shown). The rail simply clips to the connection in the awning and to the front pole.

Code | CE740355 |

## Rear Upright Poles

Most of our awnings come complete with sewn-in bumper pads that create a seal between the awning and caravan. The seal can be enhanced by using one of our Rear Upright Pole Sets. Steel or deluxe aluminium sets available.

Steel	<b>Code</b>	CE730203
Aluminium	<b>Code</b>	CE730205
Carry Bag	<b>Code</b>	CE7462

## Packing Pads

Fills the gap between the air poles and the caravan to create a tauter roof and help shed water. Supplied in packs of eight. Use as many as required.

<b>Code</b>	CE7300
-------------	--------

## Monsoon Poles

Designed to fit our poled awnings, the Monsoon Pole adds extra tensioning for the roof panels; particularly useful in wet weather. Supplied as a complete aluminium set for the Ace.

Ace Pro	<b>Code</b>	CE750353

# LIMPET™

Patent Pending

## Limpet™ Fix System

An ingenious way of attaching the rear wall of your awning to your caravan, most Kampa AIR awnings come Limpet™ Fix Ready. Simply attach the Limpet through the pre-cut holes in the rear of the awning and fasten to a smooth caravan surface. There are four holes each side of the awning. Limpets come in a pack of eight. Extra holes, to suit your caravan, can be made using the Kampa Limpet Hole Punch.

Pack of 8 Limpets	<b>Code</b>	AC0320
Limpet Hole Punch	<b>Code</b>	AC0322

*Excludes Pop AIR Pro & Sunshine AIR Pro. Not suitable for use on decals.*

## Inner Tent

Add sleeping accommodation to your awning.

Code	Item
CE7401	Universal Two-Berth Inner Tent
CE740352	Two-Berth Inner Tent suitable for Rally 200 (Poled and AIR)

## Repair Kits

If your awning becomes damaged it can be repaired on-site using one of our repair kits.

Code	Item
CA9001	Awning & Tent Repair Tape - 7.5 x 50 cm
CA9011	Repair Solution - 3 x 5g Tubes
CA9013	Seam Sealant - 60ml Tube
CA9009	Inflatable Repair Kit
CA9015	Tent & Awning Repair Kit
154016	Awning and Tent Cleaner - 1 L

## Storm Tie Down Kit

All our awnings come ready fitted with attachments to accept our Storm Tie Down Kit. If you're expecting particularly windy weather these will assist the guy lines already fitted to the awning. Supplied in pairs complete with large pegs.

Standard equipment on All-Season and Revo Zip.

Code  
CE740356

# Gale

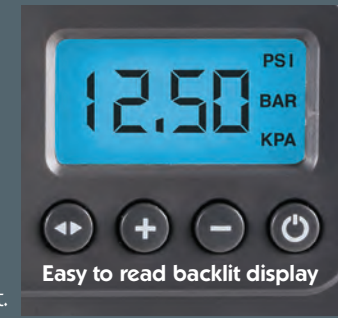

## Gale 12V Electric Pump

12V electric pump designed specifically for use with Kampa AIR awnings. Simply plug into a 12V power source using the extra long cable, set the required PSI and let the pump take care of the rest.

Example Times*	Model	Time to Inflate to 9 psi
	Rally AIR Pro 260	3 min 25 sec
	Rally AIR Pro 390	3 min 51 sec
	Ace Air Pro 400	4 min 50 sec
	Frontier AIR Pro 400	5 min 58 sec

Suitable for all Kampa AirFrame products

Code	Item
PU0165	Gale 12V Electric Pump
PU0166	<b>NEW!</b> Gale Carry Bag

**NEW!**

Gale Carry Bag

## Downdraught 2.2 Hand Pump

Supplied with all our AIR awnings. The pump is taller so you don't need to bend down as far. Because it only works on the down stroke, it requires a lot less effort – you'll certainly notice the difference.
