OUTWELL® INFLATABLE CARAVAN AWNINGS

Innovation and subtle style combine in the all-new Outwell® inflatable caravan awnings to bring fresh roomy designs inspired by aspects of the Nordic seascape that has so much influence on the award-winning brand's Danish heritage. Two collections comprise four models that offer a total of 11 sizes to suit all needs and feature the stunning looks combined with smart practical detail that defines Scandinavian style to complement every caravan and enhance the outdoor experience.

Great news for 2018!

DESIGNED IN SCANDINAVIA

INSPIRED BY NORDIC SHORELINES

Danish-based Outwell enjoys a proud heritage that places the highest value on partnerships, delivers commercial success and has integrity at its heart. Our inspired designers build on our strong Scandinavian heritage to bring technical excellence and style to the functional innovations that are the hallmark of Outwell premium performance awnings. Finding inspiration in the wild beauty of our Nordic seascapes they enjoy throughout the year, our designers' creativity transforms visionary concepts conceived through experience into our innovative caravan and drive-away awning collections that extend our unrivalled reputation for delivering home-from-home comfort on site and on tour.

We design and deliver the finest awnings, tents and camping equipment in the world and are delighted to have you with us on the journey.

OUTWELL® DRIVE AWAY AWNINGS

Outwell aims to provide the much-needed extra living space needed to ensure comfort on longer breaks through its 2018 drive-away awnings and Touring Canopies. Scandinavian function and style is brought to the market through eight air and eight pole drive-away awnings that are already recognised for their superlative quality and chic looks that stand out from the crowd. And their evolution ensures choice of designs, features and ease of use meet the needs of the modern four-wheeled adventurer, with an additional three sizes of Touring Canopy and a selection of options to enhance versatility and the outdoor experience.

the coast...*

Innovative caravan awning design

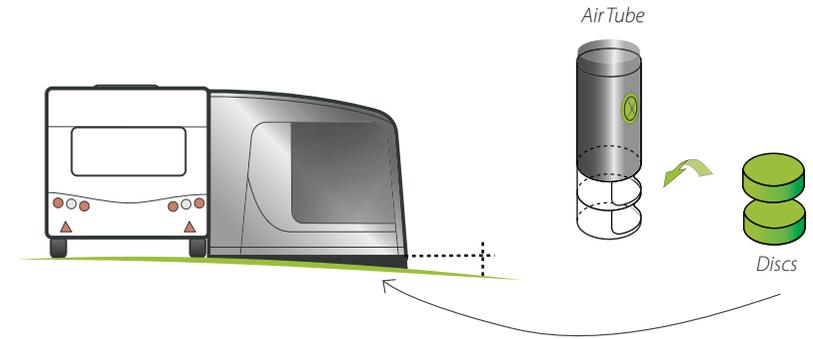

EXCEEDING AWNING EXPECTATIONS

SPECIAL FEATURES FOR THE NORDIC SHORE AND NORDIC COAST COLLECTIONS

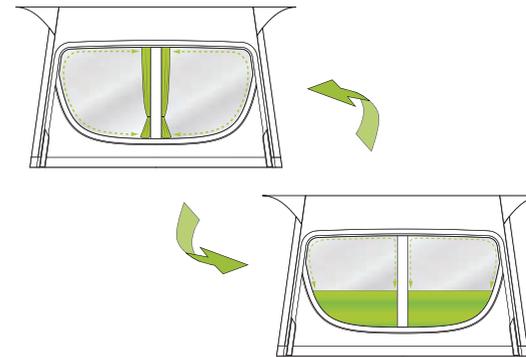

POLE-FREE SEAL SYSTEM

Our Pole-free Seal System easily and quickly provides a tight connection between the awning and the caravan without resorting to poles that can damage a caravan wall. An integral padded beam is held against the caravan wall by an adjustable tape. This ends in a triangular fabric extension that allows the use of two pegs to enhance security in bad weather. Once erected and fine-tuned, the whole assembly is hidden from sight using an attached cover that blends into the awning wall. Optional EVA foam discs can be used between the tape and beam to ensure the seal around projections, like windows.

HEIGHT ADJUSTMENT SYSTEM

To overcome the problem of levelling an inflatable awning on an uneven pitch, we have developed the Height Adjustment System. Up to four optional EVA foam discs can be inserted into a pocket located at the end of each tube to compensate for ground fall and work with the Pole-free Seal System to hold the awning firmly against the caravan.

360° CURTAINS*

From fully closed to fully open and removed, the front curtain zips provide a wide choice of positions to suit personal preference, balancing light in with views out and privacy. Half open, the curtains create an attractive and practical veranda effect that enhances the awning's overall design.

*Not for Pebble Awnings

EXPLAINING THE AWNING ICONS

Each year we deliver groundbreaking innovations for the benefit of discerning campers, caravanners and motorhome owners. It's an excellent record and we're proud of the rigorous way in which our designers approach each challenge to bring a huge amount of original style and practical detail to the market. Each awning is a careful blend of imagination, inspiration, style, technical innovation, features, fabrics and components. Each has a big story behind the headline and that story is best delivered in a visual way, enabling fast overviews and clear cross-comparisons. We use icons to quickly provide clear, no-fuss identification that is easily communicated in store and online. These simple, effective symbols sum up complex product solutions.

NORDIC SHORE

OUTTEX® 6000 HD
A special process creates our ultra-rugged High Density weave for superior performance and looks.

TAPED SEAMS
Extra protection across all seams, the tape ensures no chance of any water ingress.

ADVANCED AIR TUBE SYSTEM
Inter-connected air tube frame with one inflation valve, featuring isolation valves, and one full horizontal tube along the roof.

ONE-GO INFLATION
Super fast inflation via a single air inlet valve through the inter-connected air tubes.

TINTED WINDOWS
Windows with a tinted coating that protects against the sun's glare and provides privacy while maintaining great views out.

REMOVABLE FRONT AND SIDES
Opens occupants to the full outdoor experience while providing overhead cover.

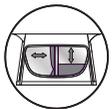

REFLECTIVE WEBBINGS
Creates secure anchoring while minimising trip hazard.

POLE-FREE SEAL SYSTEM
Pole-less design creates a tight seal between awning and caravan that reduces risk of damage.

HEIGHT ADJUSTMENT SYSTEM
Spacer discs inserted into the tube pocket compensates for uneven ground for level erection.

CURTAINS 360°
Versatile zip configuration allows flexible use of curtains for optimum effect.

CARRYBAG
Bag with straps for carrying the packed tent short distances.

PUMP INCLUDED
Supplied with all our Air Tube technology tents, our easy to attach, highly efficient manual one-way high capacity air pump makes short work of inflating our inflatable tents.

NORDIC COAST

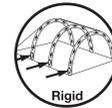

OUTTEX® 3000 HD
A special process creates our ultra-rugged High Density weave for superior performance and looks.

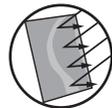

TAPED SEAMS
Extra protection across all seams, the tape ensures no chance of any water ingress.

TWINNED POLES - STEEL/AIR
A mix of air tubes and steel poles for a sturdy and flexible tent structure.

RIGID AIR SYSTEM
Features individual tubes that are inflated and deflated separately via easy access external valves.

TINTED WINDOWS
Windows with a tinted coating that protects against the sun's glare and provides privacy while maintaining great views out.

REMOVABLE FRONT AND SIDES
Opens occupants to the full outdoor experience while providing overhead cover.

REFLECTIVE WEBBINGS
Creates secure anchoring while minimising trip hazard.

POLE-FREE SEAL SYSTEM
Pole-less design creates a tight seal between awning and caravan that reduces risk of damage.

HEIGHT ADJUSTMENT SYSTEM
Spacer discs inserted into the tube pocket compensates for uneven ground for level erection.

CARRYBAG
Bag with straps for carrying the packed tent short distances.

PUMP INCLUDED
Supplied with all our Air Tube technology tents, our easy to attach, highly efficient manual one-way high capacity air pump makes short work of inflating our inflatable tents.

HEIGHT ADJUSTMENT DISCS AND SEALING BLOCKS

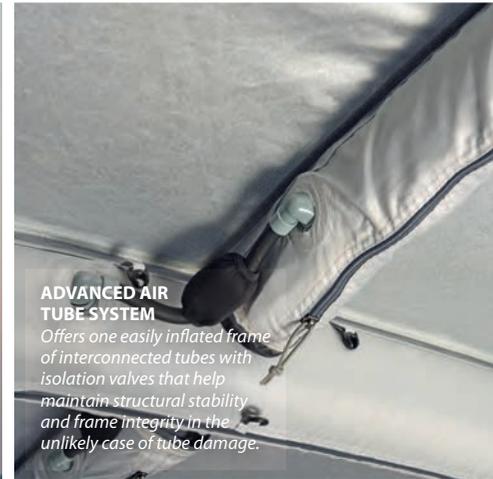

ROOF LINING
Easy to attach, essential for out of season camping

Amber 3505A

**ADVANCED
AIR TUBE
SYSTEM**

*In nature we
find serenity...*

**ADVANCED AIR
TUBE SYSTEM**

Offers one easily inflated frame of interconnected tubes with isolation valves that help maintain structural stability and frame integrity in the unlikely case of tube damage.

POLE-FREE SEAL SYSTEM

Our Pole-free Seal System easily and quickly provides a tight connection between the awning and the caravan without resorting to poles that can damage a caravan wall. An integral padded beam is held against the caravan by an adjustable tape that is pegged out and tensioned.

AMBER RANGE

The Outwell Amber caravan awning range delivers cool style that is quick and easy to pitch for secure attachment with Outwell Smart Air inflation of pre-shaped air tubes complementing the appeal and weather-beating performance of our embossed Outtex® 6000 HD fabric. A distinctive deep front canopy offers extra shade and shelter to its generous three metre depth with panel, door, curtain and mesh opening options for flexible interaction with the outdoors.

OUTWELL ONE-GO INFLATION TECHNOLOGY
An inspired innovation that allows campers to plug a super-efficient pump into a single inlet valve and quickly inflate – plug in, pump and go!

Tide 3805A

**ADVANCED
AIR TUBE
SYSTEM**

*Your family
deserves the best...*

MESH SIDE PANELS

The insect-proof mesh makes sure that irritating biting visitors are excluded. Can be opened in various ways, including part opened to match the side door or fully opened and removed for the full-on outdoor experience.

REMOVABLE FRONT

Our removable fronts allow the living space to integrate with the surroundings for the full outdoor experience. When closed, large tinted windows protect from the sun's glare while allowing great views out and maintaining privacy.

TIDE RANGE

SIDE RAIN SHIELDS
Two wings project out of the roof panel above the side doors to help prevent rain and water runoff entering the awning. The Side Rain Shield support is provided by the beading running through the caravan rail.

The Outwell Tide caravan awning range delivers cool style that is quick and easy to pitch for secure attachment. Outwell Smart Air inflation of pre-shaped air tubes complements the appeal and weather-beating performance of our grey and embossed blue Outtex® 6000 HD. Its generous three meter depth with panel, door, curtain and mesh opening options offers flexible interaction with the outdoors whilst the Side Rain Shield side entrance is welcome in wet weather.

Great news for 2018!

NEED MORE SPACE?

EXTRA OPTIONS FOR THE CARAVAN AWNINGS

A caravan awning provides much needed extra living space but on the rare occasions this isn't enough then Outwell® has the answer. If friends and family staying over proves too much for your caravan's facilities or you're looking for additional outside storage away from the public's gaze, then an optional, versatile Outwell zip-in inflatable annexe is the perfect solution.

These comprise two versions. The Annexe Sleep provides extra bedroom space that sleeps up to four adults in roomy comfort with standing headroom and superb ventilation. The Annexe also offers handy storage – especially for larger items, like bikes. The Annex Air creates a deep, enclosed side porch entrance perfect for wet gear or for extra living space lit by the large tinted windows.

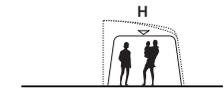

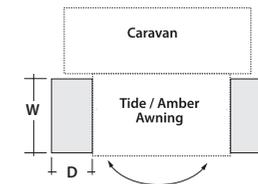

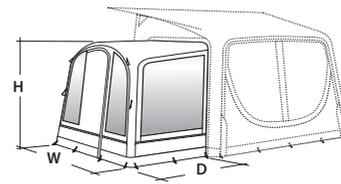

Outwell Sailshade M and L provide simpler options for those who want to add a shady outdoor space for play and relaxation. These attach to an Outwell awning via buckles, reflective web tapes and two telescopic King Poles, or directly to a caravan or motorhome using the beaded edge.

Outwell looks after
THE DETAIL

DRAUGHT SKIRT WITH STORAGE FOR CARAVAN AWNINGS

The Outwell draught-skirt with mesh storage is a handy two-in-one essential that helps keep your awning tidy and cold air out. When opened the mesh storage also works as a nice ventilation. Easy to attach, it's a perfect choice for every trip.

VERANDA POLE FOR AWNINGS 2.5 M OR 3 M

Veranda Poles are a quick and handy way to add extra ventilation to your awning. Simply attach them half way down the front of your awning. Then unzip the top section of the window to let in air while retaining privacy.

UPRIGHT REAR POLE SET FOR AWNINGS

Steel poles made to fit pre-mounted pockets on the sealing system of your Outwell awning to creates pressure and seal against the caravan side.

SEAL BLOCKS FOR CARAVAN AWNINGS

Every caravan is different, which is where Outwell Sealing blocks come in. Use these to firmly attach your awning to your caravan at any irregular points, so your awning stays secure with less chance of drafts.

HEIGHT ADJUSTMENT DISCS FOR CARAVAN AWNINGS

Prepare for uneven ground with Outwell height adjustment disc. These quickly adjust the tube height of your awning, bringing both sides up to the same level. The discs are 4 cm tall and there are four in a pack.

SMART AIR TOURING COLLECTION

Extending versatile campsite comfort, our inspired innovation, flexible designs, smart colourways plus a full catalogue of unique features ensure the updated Smart Air Touring Collection will maintain its well-deserved popularity with discerning motor campers.

ADVANCED AIR TUBE SYSTEM

Our air tube tent support construction innovation has had a huge effect on the camping market. As a key element of our Air System technology, this offers one frame of interconnected tubes with isolation valves that help maintain structural stability.

ISOLATION VALVES

Anticipating the unlikely is a key element in product development so our isolation valves ensure frame integrity in the event of the durable, resilient inflatable tube being accidentally or maliciously damaged.

TINTED WINDOWS

With a special developed coating that reduces the penetration of harmful UV radiation, the sun's heat and glare are reduced whilst allowing wide views with privacy. Large tinted windows not only add to a tent's style but also deliver practical benefits.

OUTWELL ONE-GO INFLATION TECHNOLOGY

Outwell One-go Inflation Technology is an inspired innovation that allows campers to plug a super-efficient pump into a single inlet valve and inflate the largest of tents in a minute – plug in, pump and go!

FULL MESH FRONT

Allowing fresh air to flow through as required, the insect-proof mesh makes sure that irritating biting visitors are excluded.

OUTWELL SEALED GROUND SYSTEM

A sealed-in groundsheet is the best way to keep draughts, insects, dirt and water out of a tent and is an early example of Outwell camping solutions. When the groundsheet is an integral part of the tent it ensures all-weather protection from the ground upwards.

OUTTEX® 6000

Specially commissioned by us, this smart, durable flysheet fabric has an effective, reliable hydrostatic head waterproof rating and enjoys subtle embossing with our graphic logo.

ROLL UP CANOPY SIDES

Canopy sides roll and toggle back to provide views while maintaining overhead shade.

OUTWELL LINK ACCESS ZONE SYSTEM WITH SIDE DOORS

Unobstructed full-open rear for quick and easy access to the vehicle, with Outwell Link Access Zone System valance that closes the gap between the vehicle to keep out draughts.

AIR CRUISING COLLECTION

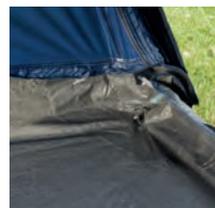

Using reliable Rigid Air System, our Air Cruising Collection of freestanding, drive-away awnings adds flexible shelter quickly, easily and securely to a wide range of motor vehicles. Ideal for touring couples and families, the extra space transforms life on site.

RIGID AIR TECHNOLOGY
The Rigid Air System features individual tubes that are inflated and deflated separately through external valves for easy access.

FULL REAR OPENING
Unobstructed full-open rear for quick and easy access to the vehicle except Milestone Air.

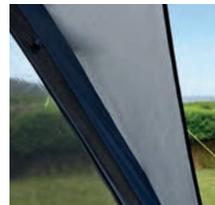

OUTWELL SEALED GROUND SYSTEM
A sealed-in groundsheet is the best way to keep draughts, insects, dirt and water out of a tent and is an early example of Outwell camping solutions. When the groundsheet is an integral part of the tent it ensures all-weather protection from the ground upwards. The zip-out facility adds versatility.

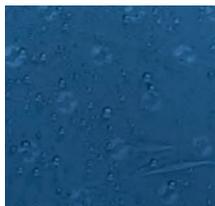

HIGH PRESSURE PUMP
This high pressure, high capacity, single-stroke manual pump with manometer includes a number of adaptors and is perfect for use with inflatable tents, awnings etc. 60cm high for optimum comfort.

TOGGLE-UP CURTAINS
Toggle-up curtains behind the tinted windows ensure privacy when required and plenty of natural light when fastened up quickly and securely.

TINTED WINDOWS
With a special developed coating that reduces the penetration of harmful UV radiation, the sun's heat and glare are reduced whilst allowing wide views with privacy. Large tinted windows not only add to a tent's style but also deliver practical benefits.

OUTTEX® 3000
Specially commissioned by us, this smart, durable flysheet fabric has an effective, reliable hydrostatic head waterproof rating and enjoys subtle embossing with our graphic logo.

OUTWELL LINK ACCESS ZONE SYSTEM WITH SIDE DOOR
Used when connecting a drive-away awning to a vehicle, the Outwell Link Access Zone System acts as a valance to close the gap between the vehicle and the ground, working with the awning's groundsheet to create clean, draught-free access into the tent. (Not for Milestone Pace Air)

FULL MESH FRONT
Allowing fresh air to flow through as required, the insect-proof mesh makes sure that irritating biting visitors are excluded.

memories...*

TOURING COLLECTION

Our Touring Collection of freestanding, drive-away awnings adds flexible shelter quickly, easily and securely to a wide range of motor vehicles. Ideal for touring couples and families, the extra space transforms life on site.

FULL MESH FRONT
Allowing fresh air to flow through as required, the insect-proof mesh makes sure that irritating biting visitors are excluded.

OUTWELL LINK ACCESS ZONE SYSTEM WITH SIDE DOORS
Unobstructed full-open rear for quick and easy access to the vehicle, with Outwell Link Access Zone System valance that closes the gap between the vehicle to keep out draughts.

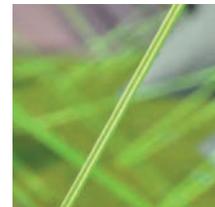

TINTED WINDOWS
With a special developed coating that reduces the penetration of harmful UV radiation, the sun's heat and glare are reduced whilst allowing wide views with privacy. Large tinted windows not only add to a tent's style but also deliver practical benefits.

OUTTEX® 4000
Specially commissioned by us, this smart, durable flysheet fabric has an effective, reliable hydrostatic head waterproof rating and enjoys subtle embossing with our graphic logo.

OUTWELL SEALED GROUND SYSTEM - SEWN-IN
A sealed-in groundsheet is the best way to keep draughts, insects, dirt and water out of a tent and is an early example of Outwell camping solutions. When the groundsheet is an integral part of the tent it ensures all-weather protection from the ground upwards.

LUMINOUS GUYLINES
As active campers, Outwell designers developed a simple, practical solution to the problem of tripping over unnoticed guylines – a simple solution that others have seized on since.

OUTWELL WIND STABILIZER SYSTEM
The patented Outwell Wind Stabilizer System was a huge and important innovation in tent stability, proven in development and in the field. It creates a direct attachment point between the outer tent, tent pole and peg for reliable security in gale-force, gusting winds.

STEEL AND DURATEC POLES
This combination ensures flexible structural strength whilst optimising weight.

ZIP-UP CURTAINS
With quick and easy zip opening and closure, these curtains give full flexibility of choice between total privacy, letting in some daylight or enjoying the views.

TOURING CANOPIES

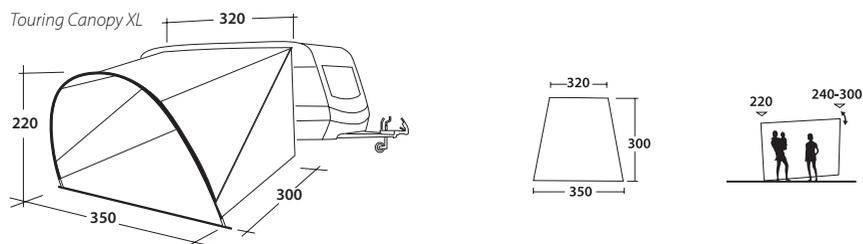

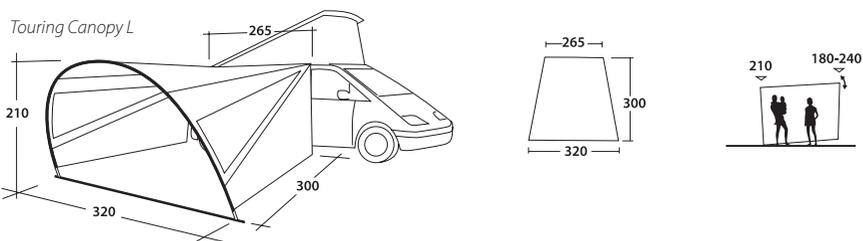

The Touring Canopy range is perfect for stopovers or overnight stays. With attachment heights between 180-330cm (M) and 180-300cm (L and XL) there is ample flexibility to quickly add shelter to a wide variety of cars, caravans and motorhomes. A front steel hoop provides headroom and stability that's enhanced by luminous guylines. L and XL models have side walls with windows and the bottom of the fabric has toggle adjustment to match unit height.

SPECIFICATIONS

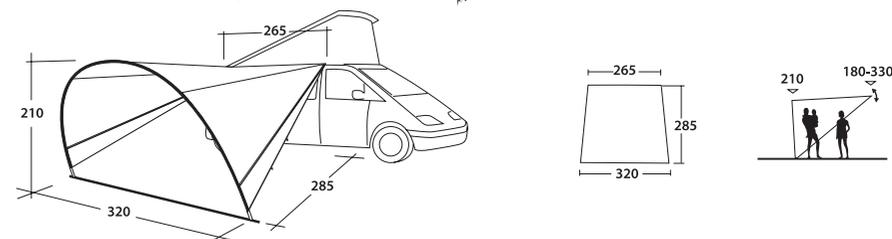

Flysheet: Outtex® 3000 (100% polyester taffeta) with taped seams

Poles: Steel poles 19 mm

CRUISING COLLECTION

Packed with innovative features, our Cruising Collection of practical, freestanding, drive-away awnings adds flexible shelter quickly, easily and securely to a wide range of motor vehicles. Ideal for touring couples and families, the extra space transforms life on site.

FULL MESH FRONT
Allowing fresh air to flow through as required, the insect-proof mesh makes sure that irritating biting visitors are excluded.

OUTTEX® 3000
Specially commissioned by us, this smart, durable flysheet fabric has an effective, reliable hydrostatic head waterproof rating and enjoys subtle embossing with our graphic logo.

DURATEC FIBREGLASS POLES
Exceptional strength and rigidity is achieved by using our own fibreglass-based blend of light, flexible materials.

OUTWELL WIND STABILIZER SYSTEM
The patented Outwell Wind Stabilizer System was a huge and important innovation in tent stability, proven in development and in the field. It creates a direct attachment point between the outer tent, tent pole and peg for reliable security in gale-force, gusting winds.

OUTWELL LINK ACCESS ZONE SYSTEM WITH SIDE DOOR
Used when connecting a drive-away awning to a vehicle, the Outwell Link Access Zone System acts as a valance to close the gap between the vehicle and the ground, working with the awning's groundsheet to create clean, draught-free access. (Not for Milestone Pace)

OUTWELL SEALED GROUND SYSTEM
A sealed-in groundsheet is the best way to keep draughts, insects, dirt and water out of a tent and is an early example of Outwell camping solutions. When the groundsheet is an integral part of the tent it ensures all-weather protection from the ground upwards.

TINTED WINDOWS
With a special developed coating that reduces the penetration of harmful UV radiation, the sun's heat and glare are reduced whilst allowing wide views with privacy. Large tinted windows not only add to a tent's style but also deliver practical benefits.

LUMINOUS GUYLINES
As active campers, Outwell designers developed a simple, practical solution to the problem of tripping over unnoticed guylines – a simple solution that others have seized on since.

Tips for you!

HOW TO CONNECT A DRIVE-AWAY AWNING

Outwell® drive-away awnings can be connected to the majority of motorhomes, MPVs and vans in numerous ways for ease of use and ultimate convenience.

Connect with hook and loop band

Hook and loop tabs allow an awning to be quickly and simply attached to convenient points on the vehicle, like roof bars.

Connect with Suction Cup

Highly efficient suction cups quickly and easily clamp to the vehicle and act as sturdy, secure attachment points.

Connect with guylines

Awnings can be connected using guylines thrown over the vehicle roof and attached to convenient points or pegged out.

Connect to rail

The beaded edge of an awning can be simply inserted and fed through an existing C-rail if intending to leave the vehicle with the awning during the stay.

Connect with Outwell Magnetic Band Connector

A magnetised strip in the Magnetic Band Connector attaches to the unit and creates a channel in which to slide the awning or Outwell Touring Connect Set.

Connect with Outwell Touring Connect Set

Comprises double edge beaded tape and Figure of 8 strip to enable quick and convenient detachment of the vehicle when leaving the awning on site. Also for use with a gutter rail.

Breathable, soft and quick-drying fabric

ERGO FLEXI CHAIRS

The luxurious Ergo Flexi Comfort Collection of padded cushion chairs, loungers, bed and a footrest benefit from a quick-drying foam padding and Textiline mesh fabric.

Updated designs with improved armrests are joined by the new Galana four-position lounger and the Kiana dining chair with supportive back. All Teton, Kenai, Grand Canyon, Acadia and Samoa have an adjustable, integral headrest and feature a quick drying material to prevent the padding from soaking up water if left out in the rain.
