SunnCamp 2018

INTRODUCTION

For over 30 years SunnCamp has been manufacturing outdoor products including Caravan Awnings, Motor Awnings, Trailer Tents and Tents. Our aim is to produce the best range of meticulously designed, exceptionally well-made and fantastic value products that will give you and your family the best outdoor experience. All our products are made from specially developed fabrics and have a vast range of features and attention to detail.

FABRICS

All SunnCamp fabrics comply with the latest British Standard Flame Retardant Regulations

SunnCamp's ACE-TECH Fabric

Our **ACE-TECH** fabric comes in various weights and is coated with layers of a specific mix of PU waterproof coating which has been evenly and uniquely applied so that the fabric offers protection from the elements and UV light.

SunnCamp's PRO-TEK 300D Fabric

A super strength 300 denier high density fabric which has been developed by SunnCamp's technical team.

PRO-TEK 300D offers four times the tensile strength as standard 75D fabric and new improvements and technical developments have allowed our fabric to be specially woven and coated with layers of waterproof coating which have been evenly and uniquely applied so that the fabric keeps its ultra flexibility and softness, yet sits suitably in shape. **PRO-TEK 300D** has high tensile strength and offers increased protection from the elements and UV light.

Introducing SunnCamp's NEW 300D PRO-TEK Enhanced Roof Profile Fabric

Our new roof fabric further complements the appearance of our products and provides a homely ambience.

150D Oxford/150D Oxford Ripstop Fabric

A high quality fabric (twice as thick as regular flysheets) providing improved protection from the weather and UV light. Our ripstop version has the same specification but has been woven using a special reinforcing technique where reinforcement threads are woven at regular intervals in a crosshatch pattern making the fabric more resistant to tearing.

AIR VOLUTION – POLE FREE INFLATABLE PITCHING

In place of conventional poles, SunnCamp's Air Volution products are pre-fitted with durable air tubes which are enclosed in a heavy duty double layer sleeve, providing an extremely secure and stable structure when inflated and guyed.

Setting up is easy...

Attach the inflator pump to the valves in the air tubes and pump until you reach the correct pressure of 7 psi. Close the valves and your product is ready for use. Air tubes should be inflated to 7 psi.

Air Volution Advantages

- Quick, simple and effortless pitching and take down
- Robust maintenance free inflatable tubes replace conventional poles
- Products can in most cases easily be erected by one person

SPECIFICATIONS

Standard Specification

- Waterproof and Fire Retardant Flysheet
- Taped seams
- Heavy duty zips
- Curtains on windows
- Colour coded poles and sleeves (poled items only)
- Pre attached guylines

GLOSSARY

Non standard specification/features:

Storm pole pocket:

Certain models have an integral storm pole pocket and when used in conjunction with our optional upright poles (DT0052) can be used in certain conditions to aid stability and help water dispersal. Check individual entries for details.

Air flow doorway:

A separate ventilated mesh panel incorporated behind a door panel. This can be rolled back or zipped in place to aid airflow and reduce condensation whilst keeping bugs out. Check individual entries for details.

Sewn in groundsheet:

All tents and certain motor awnings models come with a sewn in groundsheet system offering protection from insects, dust, the elements etc. Check individual entries for details.

Veranda option:

Certain awnings come with a veranda option which allows you to fold the panel of your awning over a veranda pole to give a veranda effect. Simply locate the veranda pole (DT0091) in the pockets in the relevant panel. Check individual entries for details.

Storm buckles and straps:

Storm buckles and straps are provided as standard on all air evolution models.

Window lights:

Certain awnings come with windows in the roof with velcro fastening curtains to enhance the light inside your awning. Check individual entries for details.

Enhanced Roof Profile:

SunnCamp's Enhanced Roof Profile is utilized on caravan awnings and motor awnings manufactured in our 300D Pro-Tek fabric, further complementing the appearance and providing a homely ambience.

Privacy Screen:

Many of our motor awnings come as standard with a simple divider for the tunnel area which may be attached to divide the tunnel to offer privacy. Check catalogue entry for details.

Standard specification/features:

Waterproof flysheet:

6000MM HH (except Protekta range). All flysheets comply with the latest British Standard Flame Retardant Regulations.

Taped seams:

Main seams have been heat sealed with a polyurethane tape to give extra waterproof protection. Remaining seams and seams where tape has been broken during production and/ or to necessitate tie points, suspension points etc., should have seam sealant applied to them.

Zips:

Heavy duty SunnCamp zips are used throughout our range of products.

Windows:

All windows have curtains with velcro or toggle fixings.

Colour coded poles and sleeves:

Where a product has different length poles, to aid setup our poles and sleeves are colour coded.

Rear pads:

SunnCamp porch awnings come as standard with rear weather pads. Rear weather pad poles are not standard – please check individual entry for details.

Draught skirt:

A PVC or PE draught skirt (varies over models) is included as standard with all porch awnings (except Swift Canopy and Protekta models).

Figure of 8:

Supplied as standard on all motor awnings.

Daylight panel:

Where necessary tents have been designed with a daylight panel (light colour fabric over the living area) enhancing light access.

Cable entry point and tidy system:

All tents come with a zipped entrance allowing a mains lead to run safely into your tent. The cable tidy system which consists of velcro fastening points allows the cable from a mains powered light to be stored safely.

Twilight Inner Tents:

Where inner tents are provided, they have been darkened for extra comfort.
