

# VENTURA

FOR CARAVANS AND MOTORCARAVANS

## PACIFIC 250 & 300 - Lightweight, simple to assemble and maintain

The modern Pacific is available in shades of cleancut grey. The model boasts simple construction, making it particularly easy for touring. The material is a lightweight VenTex fabric, which is also easy to keep clean thanks to its external coating. It has a mosquito net window with foil cover in one side for extra ventilation.

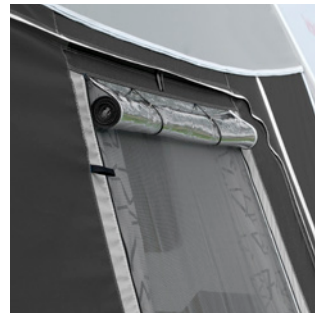

So if you are looking to save time when camping, Pacific is the ideal choice. Choice of Prenox steel frame or the lightweight IXL fibreglass frame for touring.

## THE DETAILS are the extras that make a product special

- 1** Regulator tabs and spiked shoes ensure uniform tensioning. By locking the canvas and frame together these help to hold the canvas in place.
- 2** Roof fit. Superior fit to the caravan. The roof panels are contoured to give a better fit to the shape of your caravan. Optimum placing of the roof poles and with FixOn brackets your roof is tensioned perfectly.
- 3** Prenox steel frame. The external zinc coating of the steel frame is 50% thicker than traditional surfaces, for extra long life.
- 4** IXL fibreglass frame. Light-weight and corrosion resistant frame. The fibreglass frames for full awnings have Fibremax rafter poles with a mighty 30.5 mm diameter.
- 5** All IXL fibreglass frames are supplied with Fixus™ Locking clamps. With Fixus in place, keeping the frame in position is easy. With one press of the hand grip, a discreet "click" tells you that Fixus is locked in position.
- 6** Screw-free Fixon™. Designed for better positioning of rafter poles for improved tensioning. Quick and easy positioning without being permanently affixed to the caravan.
- 7** Luxor Grey curtains: Pacific 300, Pacific 250, Marlin, Cadet.  
Luxor White: Cito, Trinus, Vivo
- 8** Bowline Spring curtains: Freestander Cumulus.
- 9** All awning models are supplied standard with curtains.

## FIND THE CORRECT SIZE of your awning

To ascertain the correct size, you need to know: Caravan make, model, year, and A-measurement.

### How to find the A-measurement (A)

Place the caravan on even ground. Measure from ground level at most forward point of channel to most rearward point of awning channel, and straight down to the ground. For porches the height of the awning rail (B) is essential - here the A-measurement does not apply.

## SPECIFICATIONS in Ventura awnings and accessories
