

OUTBACK

SUBARU

Confidence in Motion

Embrace every moment.

Never miss an adventure again. The all-new Outback inspires confidence and reduces limitations to take you wherever you'd like to go. Its new styling reinforces its tough and rugged personality, while its upgraded interior offers new refined materials and friendly technology to put you at ease. Rest assured the all-new Outback has capability mastered and considerable comfort well in hand.

▲ X-MODE* engaged

The all-new X-MODE gives you reliable control with a push of a button. The technology of X-MODE takes command of the engine, transmission, Symmetrical AWD, brakes, and other components to safely navigate through bad roads, slippery surfaces and even the steepest hills. When X-MODE is activated, Hill Descent Control automatically helps to maintain a constant speed when the Outback is travelling downhill.

*Available on Lineartronic models.

With 200mm of ground clearance, the all-new Outback makes uneven roads and steep inclines less challenging, balancing authentic SUV capability with a quiet ride and sporty, surefooted handling.

▼ 200mm ground clearance

Nothing to hold you back.

Very little stands in your way in the capable Outback. Symmetrical AWD ensures an outstanding grip in snow, rain or rough roads, and now thanks to X-MODE with Hill Descent Control it's even better at handling steep inclines and harsher terrain.

▲ **Improved Aerodynamics**

A mix of rugged looks and clever aerodynamics, the Outback is more than ready to take on new challenges. Not only does it look like it can handle tough terrain, it is also 11% more aerodynamic than the previous model, which helps it get better fuel consumption.

The Outback uses an Active Grille Shutter on the front of the car to improve fuel consumption. It closes to warm up the engine faster, and while driving, it also closes to reduce wind resistance and cold airflow. However when the engine gets hotter, it opens to cool off the engine.

▼ **Active Grille Shutter***

*Standard on petrol models.

Engage. Enjoy.

The all-new Outback allows you to enjoy almost any road on which you care to venture. Thanks to the improved SUBARU BOXER engine with excellent fuel economy you can also travel further than ever. Rugged in appearance and performance, the all-new Outback offers versatile handling and delivers driving pleasure on all types of terrain.

Grab the wheel.
Connect to the road.

Great care was taken to optimise the driver's connection to the road. Symmetrical AWD with an improved chassis and steering makes the Outback more responsive and nimble, while still being as smooth and controlled as ever.

More engaging and comfortable performance

Take on nearly any road in nearly any condition with confidence in the all-new Outback. The improved chassis delivers a superior ride quality, while a strengthened body torsional rigidity makes for a quieter, more comfortable drive with improved steering stability and durability.

Immerse yourself.

The inviting interior draws you in to a truly relaxing cabin. Plush appointments and welcoming technology add considerable comfort and convenience, while thoughtful storage throughout offers the versatility for your everyday adventures.

More comfortable rear seats

The entire cabin is roomier including more room in the back with more space under the knees than the previous model, delivering more comfort for rear passengers as well as front passengers. The rear seats recline as well making it more comfortable on long drives.

Larger sunroof*

Enjoy a more open feel with the new larger sunroof. The inner sliding sunroof includes tilt-up and auto-reverse features to bring in more light as well.

*Standard on all SE Premium models.

An interior that embraces your needs.

Relax and enjoy. Roomier, richer materials and upgraded technology mean there's much to enjoy inside the all-new Outback.

Illuminated meter

A blue illumination on the meters*¹ helps improve visibility. Plus the LCD meter centre display is linked to the meter and shares helpful info like turn-by-turn navigation, notice of an incoming call and even a compass.

Lighting

A blue illuminated interior light*³ lends a cool, sophisticated feeling to the Outback. The pull cup holder and console box also have that welcoming blue glow, making them easier to find in the dark.

USB and auxiliary audio inputs

Plug your iPod®*² or other mobile music device into the standard AUX and USB input jack, and your music plays through the audio system of the Outback. Plus with two USB input trims*³, you can charge two devices at once.*⁴

Centre console box

The larger centre console box can hold more CDs now and even has specifically created holders for coins, card and pen.

*¹ Standard on all SE Premium models. *² Apple, iPhone and iPod are registered trademarks of Apple, inc.
*³ Standard on all models. *⁴ Driver is always responsible for safe and attentive driving.
Please refrain from using the mobile phone while driving.

Flexible solutions.

As the demands of life are varied, it's good to know the Outback can easily rise to meet them. At the push of a button, the power rear gate* gives you instant access to the cargo area making it especially easy to load up and go.

*Standard on all SE Premium models.

Power rear gate switch

Power rear gate switch under dashboard

There's more room for more of your life. Cargo capacity has been increased to make room for up to four 80-litre suitcases and the floor has been made even flatter to allow for greater luggage capacity. You can also change the seating configuration in an instant, thanks to the 60/40 folding rear seats, allowing you to haul large items and passengers.

▼ Luggage and seat combinations

Space meets possibility.

Make big plans and keep them. There's plenty of room to accommodate adventures of all sizes in the all-new Outback.

Cargo capability.

Whatever adventure you have in mind, the Outback can help make it happen. Roof rails give you lots of storage options up top, convenient side sill steps give you a firm place to stand and secure that cargo and a power rear gate with a door grip makes it a breeze to load and unload.

Roof rails

Sturdy roof rails make hauling extra items a snap. You'll find the all-new Outback has a lot of ways to get the job done.*

Convenient side sill step

To give you a firm footing when you're loading a canoe or bike up top, we placed a side sill step on both sides of the Outback for added convenience.

More ways to escape.

Getting away is its own reward, and the Outback is more than ready to help you enjoy it to its fullest.

*Requires purchase of carrier base and an attachment to load cargo on the roof rails.

STANDARD FEATURES

Symmetrical All-Wheel Drive

Control leads to confidence, and stability creates an agility that excites in the all-new Outback. Subaru vehicles are gifted at inspiring confidence behind the wheel, thanks to the inherently stable design of Symmetrical All-Wheel Drive paired with the uniquely balanced SUBARU BOXER engine. This system delivers power to all four wheels at all times for enhanced control on all roads and in poor conditions. It has excellent side-to-side balance and handling precision, thanks to its main components being aligned longitudinally, while its low centre of gravity creates an especially engaging and responsive drive. The unique advantages of Symmetrical AWD make for exceptionally rewarding handling and empower you to better avoid danger.

Active Torque Split AWD*

Paired with Lineartronic, the Active Torque Split AWD system responds to changing driving conditions by adjusting front and rear wheel torque distribution in real time, giving you the right grip for all weathers.

*Standard on Lineartronic models. 6MT models are equipped with Viscous Centre Differential AWD.

Improved suspension

Using improved front struts and rear shocks, the suspension has been finely tuned for an enjoyable balance between responsive steering and a smooth, comfortable ride.

Cradle mount frame

You'll enjoy more agile handling and a smoother ride in the Outback, thanks to its Cradle Mount System. In a collision, it allows the engine to retract under the cabin, lengthening the front crumple zone.

SUBARU BOXER Engine

Few other cars drive with the self-assured confidence of the Outback, so you won't be surprised by how uniquely it is accomplished. The horizontally-opposed configuration of the SUBARU BOXER engine places the pistons 180 degrees apart, for a lower, flatter profile than other engine types. This gives the engine, and therefore the overall vehicle, a lower centre of gravity and better sense of balance. Furthermore, the pistons' opposing movements inherently counteract each other, naturally helping to reduce vibration.

Increased stability

Because the engine block has a flatter profile and sits lower in the chassis, the overall vehicle is more stably balanced and resistant to side-to-side motion than other designs.

Long-lasting performance

The engine's flat design is inherently rigid and self-balancing, generating less vibration than V-type or 4 cylinder in-line in the same class for durability and reliability.

2.0-litre DOHC TURBO SUBARU BOXER DIESEL

Now boasting improved fuel efficiency, the 2.0-litre DOHC TURBO SUBARU BOXER DIESEL engine is an appealing option for a powerful, yet efficient passenger vehicle. A prodigious 350 Nm of peak torque is delivered at a lower 1,600 rpm for smooth power when you want it most, when you're overtaking other cars on the road or climbing up a steep hill. This new engine is also cleaner, now meeting the Euro6b standard, and it's quieter with less vibration for a more pleasant ride for everyone aboard. Ceramic glow plugs will also give you a faster start in cold weather.

MAX OUTPUT:
110 kW (150 PS) / 3,600 rpm

MAX TORQUE:
350 Nm (35.7 kgfm) / 1,600-2,800 rpm

FUEL CONSUMPTION*:
6.1 lit./100 km = 46.3 mpg (Lineartronic)
5.6 lit./100 km = 50.4 mpg (6MT)

CO₂ EMISSIONS*:
159 g/km (Lineartronic)
145 g/km (6MT)

2.5-litre DOHC SUBARU BOXER

Already naturally smooth and strong, we improved the Outback's 2.5-litre DOHC engine to make it powerful and fuel efficient. We also made specific refinements to improve its mid-to-low range torque so you'll have more power when you need it from a complete stop. You'll also find that it's more responsive around town and more satisfying on the highway, thanks to a remarkable 235 Nm of torque at a lower 4,000 rpm. When combined with the Lineartronic, it's more fuel efficient and clean-running, making it kinder to your wallet and the environment.

MAX OUTPUT:
129 kW (175 PS) / 5,800 rpm

MAX TORQUE:
235 Nm (24.0 kgfm) / 4,000 rpm

FUEL CONSUMPTION*:
7.0 lit./100 km = 40.4 mpg (Lineartronic)

CO₂ EMISSIONS*:
161 g/km (Lineartronic)

*Fuel consumption and CO₂ emissions: according to EC715/2007 - EC136/2014W. MPG figures are EU test figures for comparative purposes and may not represent real driving results.

Lineartronic

Designed to get the most out of your SUBARU BOXER engine and Symmetrical AWD, the efficient Lineartronic Continuously Variable Transmission keeps the engine in its ideal power range to give the new Outback its excellent fuel consumption at 6.1 lit./100 km (Diesel Lineartronic). New shift controls keep the ride light, smooth and responsive on both the 2.0D and 2.5i engines, while the Lineartronic in 2.0D also handles the higher-torque output with less mechanical noise for a smoother, quieter drive. The shift controls have a new stepped variable control that stays in tune with changes in vehicle speed and engine speed, allowing the driver to feel shift points when accelerating to form a strong and comfortable connection between car and driver.

PADDLE SHIFTERS*1

Paddle shifters are mounted on the steering wheel for fingertip control, giving you the power to select the gear ratio of the Lineartronic that best suits your driving situation. They also provide petrol models with a six-step manual mode and diesel models with a seven-speed manual mode for quick response on demand. The result is a sharper and sportier driving experience.

SI-DRIVE*2

Based on your driving style, SUBARU Intelligent Drive (SI-DRIVE) can adjust the throttle and shifting response to give you immediate power and agility when you crave it in nearly any scenario.

*1 Available on Lineartronic models. *2 Available on petrol models.

Sport Mode

This highly responsive mode is best suited to all-round conditions with its immediate acceleration. It puts the enjoyment back into high-speed driving on motorways, or on winding roads.

Intelligent Mode

Offering gentle power delivery, this mode is ideal for cruising around town on local streets, covering long distances, or for the high fuel efficiency. It provides flexible control in the rain or on snowy roads.

6-Speed Manual Transmission + Viscous Centre Differential AWD

For reliable control and sporty satisfaction, a slick-shifting 6-speed manual transmission is available on the Outback 2.0D models. It's paired with an AWD system utilising a centre differential with viscous LSD (Limited Slip Differential). If wheel speed differs between the front and rear axles, the system helps distribute power to the wheels with the most traction. The 6-speed offers smoother, more precise shifting, as well as lightweight, compact design to add to the Outback's sporty feel.

Intuitive technology that empowers.

Make your day-to-day brilliant. The ingenious design and technology of the Outback work exceptionally well and are especially useful. A 7-inch centre touchscreen and LCD meter centre display give you access to it all. A new audio system with six speakers is available for your enjoyment. Plus the entire infotainment system is compatible with smartphones, making it easy to stay connected.*1

User-friendly

Intuitive navigation makes the infotainment system easy to use. Its large, 7-inch centre touchscreen is easy on the eyes and its simple icons are easy to recognise.

Turn-by-turn navigation

Turn-by-turn navigation instructions now appear on an LCD meter centre display, making it easier to get directions without having to look to the side for them on the navigated screen.

Touchscreen control

The touchscreen is a useful way to select your music, just as you would on your smartphone. Simply connect your smartphone through Bluetooth®*2 or the USB port, and you can choose your music right on the touchscreen.

Voice recognition*3

One shot voice recognition*3 allows you to speak a simple command such as "Call Paul" and the system obeys. You can also issue a command via the touchscreen as needed or buttons on the steering wheel.

Rear-view camera

The screen also displays the rear-view camera, now with a super-wide view for better visibility. Its position has also been revised to create a more centred natural view for the driver.

*1 Driver is always responsible for safe and attentive driving. Please refrain from operating the touchscreen while driving. *2 Bluetooth is a registered trademark of Bluetooth SIG, Inc. America. *3 Voice recognition is compatible with select languages only and cannot accept all languages.

Bringing your life together with a tap.

An enhanced STARLINK infotainment system* brings your digital life together with access to news, stocks, weather, apps, internet radio and more to enhance the way you live. Its improved functionality lets you navigate and zoom just like you would on your smartphone, all on a vivid, high-definition 7-inch centre touchscreen. Simply download the STARLINK app to your smartphone and enjoy. Mirror Link system is also available, which mirrors what you see on your smartphone to your 7-inch centre touchscreen. Together with the new audio system with speakers, almost unlimited entertainment is well within reach in the all-new Outback.

SUBARU STARLINK*

The SUBARU STARLINK system grants safe access to internet radio, apps and more via an available capacitive touchscreen, multifunction steering switch or voice commands.

*Optional
Driver is always responsible for safe and attentive driving. Please refrain from operating the touchscreen while driving. Package communications fee may be charged depending on your area. Compatible with iPhone, iPod, and Android phones. Apple, iPhone and iPod are registered trademarks of Apple Inc.

Field of vision range from EyeSight (not an actual measurement).

Subaru's world-leading Driver Assist Technology.

At Subaru, we believe in ALL-AROUND SAFETY and an important part of that is pre-collision safety, making sincere efforts to ensure an accident never happens. That's why we created EyeSight*¹, Subaru's cutting-edge driving support system. Like a second pair of eyes for the road ahead, EyeSight uses two stereo cameras capturing three-dimensional colour images with excellent image recognition, nearly as capable as the human eye. Using images from both cameras to precisely determine the shape, speed and distance, it not only detects vehicles, but also motorbikes, bicycles and pedestrians.*² When spotting potential danger, it warns the driver and even applies the brakes if necessary, to help avoid an accident. With improved safety performance like this, EyeSight reduces the burden on the driver and enhances your sense of security in the Outback.

*¹ EyeSight is a driving support system which may not operate optimally under all driving conditions. The driver is always responsible for safe and attentive driving and observance of traffic regulations. System effectiveness depends on many factors such as vehicle maintenance, weather and road conditions. See Owner's Manual for complete details on system operation and limitations for EyeSight including functions in this brochure.

*² As EyeSight can detect only objects of more than 1 metre above the ground, children measuring less than 1 metre in height are not sensed. There may be cases when detection is not possible depending on a variety of conditions.

*³ Pre-collision Braking System may not work in all situations. Depending on the speed difference from objects, the object's height and other conditions, every situation may not meet the necessary conditions for EyeSight to work optimally.

EyeSight offers two kinds of technologies: Driver Assist to help with your awareness on the road, and Accident Prevention to help intervene and stop an accident from happening.

Driver Assist

Adaptive Cruise Control

EyeSight doesn't only maintain the speed the driver sets as traditional cruise control does. When it senses a vehicle in front, Adaptive Cruise Control adjusts the speed to keep a set distance from the lead vehicle by monitoring the distance and the difference of the speed. It adjusts the engine, transmission and brake to keep your speed in line with the traffic flow in a range approximately from 0-110 mph. Designed for use on motorways and similar roads, Adaptive Cruise Control actually detects a lead vehicle and its brake lamps and can help keep pace in stop-and-go motorway traffic for you, a comfort and convenience on long drives.

Lane Sway and Departure Warning

When you are distracted by fatigue and are wandering or drifting in a lane, Lane Sway Warning helps you stay alert with a buzzer and a flashing indicator. However, Lane Sway Warning only activates at speeds of approximately 37 mph or more. When travelling at speeds of approximately 31 mph or more, and you accidentally drift to the edge of your lane and begin to depart your lane without signalling, Lane Departure Warning warns you with a buzzer and a flashing indicator before you leave your lane.

Lead Vehicle Start Alert

When you're at a stop and EyeSight senses that traffic has started moving again, Lead Vehicle Start Alert prompts the driver to take action with a buzzer and a flashing indicator.

Accident Prevention

Pre-collision Braking System

When it senses an impending collision with a vehicle or other obstacle in front, the Pre-collision Braking System can warn the driver with a buzzer and a light on your dash. If the driver still does not take evasive action to avoid the collision, the system can automatically apply the brakes to reduce any impact, or if possible, prevent the collision as well. If the driver takes evasive action to avoid a collision, Pre-collision Brake Assist can act to aid the driver in preventing the collision.*³

Pre-collision Throttle Management

When EyeSight sees an obstacle in front of you and you put the vehicle in drive instead of reverse, Pre-collision Throttle Management sounds several short beeps, turns on a flashing indicator and cuts the engine output to help you avoid a frontal collision.

Pre-collision Steering Assist

When it spots a potential frontal impact, Pre-collision Steering Assist helps drivers make a sharp turn to avoid a collision.

Prepared to avoid.

At Subaru, we believe the best accident is the one that never happens. That's why we've equipped the all-new Outback with Symmetrical AWD to ensure control in nearly any weather condition and the SUBARU BOXER engine to enhance stability with its lower centre of gravity. The Vehicle Dynamics Control System and generously sized brakes also give the Outback athletic reflexes to make it more nimble when you need to steer clear of danger.

Increased visibility

We adjusted the frame to increase your visibility and decrease your blind spot area. We also installed front quarter windows with door-mounted side mirrors to reduce the front blind spot for increased forward visibility.

Vehicle Dynamics Control System

Vehicle Dynamics Control (VDC) monitors and analyses if the vehicle is following the driver's intended course via an array of sensors. If the vehicle approaches the limits of stability while cornering or avoiding an obstacle, the AWD torque distribution, engine output and brakes at each wheel are adjusted to assist in keeping the vehicle on course.

Active Torque Vectoring

When cornering, Active Torque Vectoring applies the brakes and distributes less torque to the inside wheels and more torque to the outside wheels. It helps make a sharp turn and handling more precise. In combination with the Vehicle Dynamics Control System, it helps to keep you out of harm's way, granting you a comforting sense of security.

Safety focused.

Knowing the importance of all that's aboard, the Outback does a lot to protect you and your passengers with high-quality safety systems like seven SRS* airbags, Ring-shaped Reinforcement Frames and even a cabin protecting layout. There may be risks in life, but we make sincere efforts to make sure that what you value most is well protected in your Outback.

Putting protection first.

We built the Outback to protect passenger, driver and pedestrian alike because we know driving enjoyment starts with security and peace of mind. We built our vehicles to reflect that. We even designed our vehicles with specific energy-absorbing and cushioning structures to protect pedestrians in the event of an accident.

5-Star Euro NCAP rating

The all-new Outback has been awarded the maximum five-star safety rating in the latest round of Euro NCAP (European New Car Assessment Programme) safety performance test.

Seats, seatbelts and SRS* airbags

Standard on the Outback are front SRS* airbags, plus front-side SRS* airbags, curtain SRS* airbags and knee SRS* airbags. Height-adjustable front seatbelts feature pretensioners to hold passengers firmly in place, and load limiters that ease peak forces to the chest.

Ring-shaped Reinforcement Frames

The Ring-shaped Reinforcement Frames strengthen the passenger cabin from the roof to the doors, pillars and floor. This design helps to divert and dissipate impact energy away from the occupants in a collision. It also contributes to strengthening and lightening the chassis, leading to greater, reinforced protection.

Cabin-protecting layout

Every Subaru goes above and beyond common practice when it comes to your safety. In the event of a head-on collision, your Outback's SUBARU BOXER engine and gearbox are designed to avoid moving into the cabin for your protection.

*SRS: Supplemental Restraint System. Must be used in conjunction with seatbelts.

EXTERIOR FEATURE

1 LED Headlamps with Auto Leveliser*¹

Get maximum illumination the instant you turn these headlamps on, and the auto leveliser will adjust the headlamps to keep them pointed at the correct angle for optimum visibility. The welcome lamps also turn on automatically when you're entering or exiting the car, to enable you to move safely even in the dark.

2 Roof Spoiler

Sophisticated and aerodynamic, the roof spoiler of the Outback is integrated seamlessly into the rear gate. The back side of it is coloured in black without coating to give it an outdoor feel and to help hide any scratches made when you're loading cargo on the roof carrier.

3 18-inch Aluminium Alloy Wheels

Multi-spoke 18-inch aluminium alloy wheels have an Outback-exclusive, rugged appearance and an aerodynamic design for improved fuel efficiency. Together with the 225/60R18 high-performance tyres, they make an attractive addition to Outback SE Premium petrol and diesel models.

4 17-inch Aluminium Alloy Wheels

Elegant 5-twin spoke 17-inch wheels are paired with 225/65 R17 tyres on the Outback SE petrol and diesel models.

5 Front Fog Lamps

These efficient lamps reflect less glare in fog for added safety, and are also helpful as daytime running lights.

6 Heated Door Mirrors

The large side mirrors include power adjustment and folding, electric heating, and integrated LED turn signals. They are also shaped to reduce wind noise for a quieter ride inside the cabin.

7 Pop-up Type Headlamp Washers*¹

To ensure the headlamps perform their best in poor weather, these pop-up washers use a high-pressure spray to clean them as needed.

8 Automatic Rain Sensing Windshield Wipers

When rainfall is detected, the available automatic windshield wipers will turn on, and adjust their wiping intervals and speed accordingly.

INTERIOR FEATURE

9 Keyless Access and Push Button Start System*²

Your key fob grants you complete keyless access. To lock/unlock the front doors or tailgate, simply grip the door handles. To start the engine, push the button. Using a 5-digit pin code allows you to enter your Subaru even without your key fob.

10 Dual-zone Automatic Air-conditioning System with Anti-dust Filter

Both the driver and front passenger can set different temperatures and the dual-zone automatic climate control will adjust the air conditioning to keep it there.

11 Tilt-adjustable/Telescopic Steering Wheel

To help ensure you're comfortable while driving, the adjustable steering wheel tilts up and down, and telescopes in and out.

12 Cruise Control

Set and maintain a specific cruising speed with one-touch cruise control, especially convenient on long drives on open motorways.

13 Rear Ventilation System

Offering added comfort for rear passengers, the Outback models include adjustable rear-cabin air vents on the back of the centre console box.

14 Vanity Mirrors with Lids and Lamps (for driver and front passenger)

We've provided illuminated and covered vanity mirrors for both the driver and front passenger.

15 8-way Power Adjustable Driver's Seat (with lumbar support)*¹

Find your ideal driving position with this 8-way power adjustable driver's seat.

*¹ Standard on all models.

*² Standard on SE Premium petrol and diesel models.

ACCESSORIES

Make your Outback truly yours.

Tailor your Outback to you and your lifestyle with Subaru accessories. Add convenience, enhance functionality, or personalise your Outback's appearance, all with Subaru accessories designed with the same fit and quality as your Subaru vehicle.
